

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended March 31, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-54030

NATURALSHRIMP INCORPORATED
(Exact name of registrant as specified in its charter)

Nevada

(State or other jurisdiction
of incorporation or organization)

74-3262176

(I.R.S. Employer
Identification No.)

15150 Preston Road, Suite 300, Dallas, TX 75248
(Address of principal executive offices) (Zip Code)

(888) 791-9474

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class
None

Name of each exchange on which registered
N/A

Securities registered pursuant to section 12(g) of the Act:

Shares of common stock with a par value of \$0.0001
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter was \$13,530,144.

(APPLICABLE ONLY TO CORPORATE REGISTRANTS)

The number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date was 135,776,879 shares of common stock as of July 13, 2018.

DOCUMENTS INCORPORATED BY REFERENCE

None.

Forward-Looking Statements

This Annual Report on Form 10-K includes a number of forward-looking statements that reflect management's current views with respect to future events and financial performance. Forward-looking statements are projections in respect of future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these terms or other comparable terminology. Those statements include statements regarding the intent, belief or current expectations of us and members of our management team, as well as the assumptions on which such statements are based. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risk and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statement. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled "Risk Factors" set forth in this Annual Report on Form 10-K for the year ended March 31, 2018, any of which may cause our company's or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. These risks include, by way of example and without limitation:

- our ability to successfully commercialize our equipment and shrimp farming operations to produce a market-ready product in a timely manner and in enough quantity;
- absence of contracts with customers or suppliers;
- our ability to maintain and develop relationships with customers and suppliers;
- our ability to successfully integrate acquired businesses or new brands;
- the impact of competitive products and pricing;
- supply constraints or difficulties;
- the retention and availability of key personnel;
- general economic and business conditions;
- substantial doubt about our ability to continue as a going concern;
- our need to raise additional funds in the future;
- our ability to successfully recruit and retain qualified personnel in order to continue our operations;
- our ability to successfully implement our business plan;
- our ability to successfully acquire, develop or commercialize new products and equipment;
- the commercial success of our products;
- intellectual property claims brought by third parties; and
- the impact of any industry regulation.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, or performance. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission (the "SEC"). We undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in the future operating results over time except as required by law. We believe that our assumptions are based upon reasonable data derived from and known about our business and operations. No assurances are made that actual results of operations or the results of our future activities will not differ materially from our assumptions.

As used in this Annual Report on Form 10-K and unless otherwise indicated, the terms “Company,” “we,” “us,” and “our” refer to NaturalShrimp Incorporated and the Company’s wholly-owned subsidiaries: NaturalShrimp Corporation, NaturalShrimp Global, Inc. and Natural Aquatic Systems, Inc. Unless otherwise specified, all dollar amounts are expressed in United States dollars.

Corporate History

We were incorporated in the State of Nevada on July 3, 2008 under the name “Multiplayer Online Dragon, Inc.” Effective November 5, 2010, we effected an 8 for 1 forward stock split, increasing the issued and outstanding shares of our common stock from 12,000,000 shares to 96,000,000 shares. On October 29, 2014, we effected a 1 for 10 reverse stock split, decreasing the issued and outstanding shares of our common stock from 97,000,000 to 9,700,000.

On November 26, 2014, we entered into an Asset Purchase Agreement (the “Agreement”) with NaturalShrimp Holdings, Inc. a Delaware corporation (“NSH”), pursuant to which we agreed to acquire substantially all of the assets of NSH which assets consisted primarily of all of the issued and outstanding shares of capital stock of NaturalShrimp Corporation (“NSC”), a Delaware corporation, and NaturalShrimp Global, Inc. (“NS Global”), a Delaware corporation, and certain real property located outside of San Antonio, Texas (the “Assets”).

On January 30, 2015, we consummated the acquisition of the Assets pursuant to the Agreement. In accordance with the terms of the Agreement, we issued 75,520,240 shares of our common stock to NSH as consideration for the Assets. As a result of the transaction, NSH acquired 88.62% of our issued and outstanding shares of common stock; NSC and NS Global became our wholly-owned subsidiaries, and we changed our principal business to a global shrimp farming company.

In connection with our receipt of approval from the Financial Industry Regulatory Authority (“FINRA”), effective March 3, 2015, we amended our Articles of Incorporation to change our name to “NaturalShrimp Incorporated.”

Business Overview

We are a biotechnology company and have developed a proprietary technology that allows us to grow Pacific White shrimp (*Litopenaeus vannamei*, formerly *Penaeus vannamei*) in an ecologically controlled, high-density, low-cost environment, and in fully contained and independent production facilities. Our system uses technology which allows us to produce a naturally-grown shrimp “crop” weekly, and accomplishes this without the use of antibiotics or toxic chemicals. We have developed several proprietary technology assets, including a knowledge base that allows us to produce commercial quantities of shrimp in a closed system with a computer monitoring system that automates, monitors and maintains proper levels of oxygen, salinity and temperature for optimal shrimp production. Our initial production facility is located outside of San Antonio, Texas.

NS Global, one of our wholly-owned subsidiaries, owns less than 1% of NaturalShrimp International A.S. in Europe. Our European-based partner, NaturalShrimp International A.S., Oslo, Norway, is responsible for the construction cost of its facility and initial operating capital.

The first facility built in Spain for NaturalShrimp International A.S. is GambaNatural de España, S.L. The land for the first facility was purchased in Medina del Campo, Spain, and construction of the 75,000 sq. ft. facility was completed in 2016. Medina del Campo is approximately seventy-five miles northwest of Madrid, Spain.

On October 16, 2015, we formed Natural Aquatic Systems, Inc. (“NAS”). The purpose of the NAS is to formalize the business relationship between our Company and F&T Water Solutions LLC for the joint development of certain water technologies. The technologies shall include, without limitation, any and all inventions, patents, intellectual property and know-how dealing with enclosed aquatic production systems worldwide. This includes construction, operation, and management of enclosed aquatic production, other than shrimp, facilities throughout the world, co-developed by both parties at our facility located outside of La Coste, Texas.

The Company has three wholly-owned subsidiaries, including NSC, NS Global and NAS.

Evolution of Technology and Revenue Expectations

Historically, efforts to raise shrimp in a high-density, closed system at the commercial level have been met with either modest success or outright failure through “BioFloc Technology.” Infectious agents such as parasites, bacteria and viruses are the most damaging and most difficult to control. Bacterial infection can in some cases be combated through the use of antibiotics (although not always), and in general, the use of antibiotics is considered undesirable and counter to “green” cultivation practices. Viruses can be even worse, in that they are immune to antibiotics. Once introduced to a shrimp population, viruses can wipe out entire farms and shrimp populations, even with intense probiotic applications.

Our primary solution against infectious agents is our “Vibrio Suppression Technology.” We believe this system creates higher sustainable densities, consistent production, improved growth and survival rates and improved food conversion without the use of antibiotics, probiotics or unhealthy anti-microbial chemicals. Vibrio Suppression Technology helps to exclude and suppress harmful organisms that usually destroy “BioFloc” and other enclosed technologies.

In 2001, we began research and development of a high density, natural aquaculture system that is not dependent on ocean water to provide quality, fresh shrimp every week, fifty-two weeks a year. The initial NaturalShrimp system was successful, but the Company determined that it would not be economically feasible due to high operating costs. Over the next several years, using the knowledge we gained from developing the first system, we developed a shrimp production system that eliminated the high costs associated with the previous system. We have continued to refine this technology, eliminating bacteria and other problems that affect enclosed systems, and now have a successful shrimp growing process. We have produced thousands of pounds of shrimp over the last few years in order to develop a design that will consistently produce quality shrimp that grow to a large size at a specific rate of growth. This included experimenting with various types of natural live and synthesized feed supplies before selecting the most appropriate nutritious and reliable combination. It also included utilizing monitoring and control automation equipment to minimize labor costs and to provide the necessary oversight for proper regulation of the shrimp environment. However, there were further enhancements needed to our process and technology in order to begin production of shrimp on a commercially viable scale and to generate revenues.

Our current system consists of a reception tank where the shrimp are acclimated, then moved to a larger grow-out tank for the rest of the twenty-four week cycle. During 2016, we engaged in additional engineering projects with third parties to further enhance our indoor production capabilities. For example, through our relationship with Trane, Inc., a division of Ingersoll-Rand Plc (“Trane”), Trane has provided a detailed audit to use data to build and verify the capabilities of then initial Phase 1 prototype of a Trane-proposed three tank system at our La Coste, Texas facility. The Company contracted F&T Water Solutions and RGA Labs, Inc. (“RGA Labs”) to complete final engineering and building of the initial patent-pending modified Electrocoagulation system for the grow-out, harvesting and processing of fully mature, antibiotic-free Pacific White Leg shrimp. The design will present a viable pathway to begin generating revenue and producing shrimp on a commercially viable scale. The design is completed and was installed in early June 2018 by RGA Labs, and final financing for the system is expected to be provided by one of the Company’s existing institutional investors. The first post larvae (PL) arrived from the hatchery at the end of June 2018, and the Company expects it will take approximately six to nine months to begin producing and shipping shrimp.

Overview of Industry

Shrimp is a well-known and globally-consumed commodity, constituting one of the most important types of seafood and a staple protein source for much of the world. According to the USDA Foreign Agricultural Service, the world consumes approximately 9 billion pounds of shrimp annually with over 1.3 billion pounds consumed in the United States alone. Approximately 65% of the global supply of shrimp is caught by ocean trawlers and the other 35% is produced by open-air shrimp farms, mostly in developing countries.

Shrimp boats catch shrimp through the use of large, boat-towed nets. These nets are quite toxic to the undersea environment as they disturb and destroy ocean-bottom ecosystems; these nets also catch a variety of non-shrimp sea life, which is typically killed and discarded as part of the shrimp harvesting process. Additionally, the world's oceans can only supply a finite amount of shrimp each year, and in fact, single-boat shrimp yields have fallen by approximately 20% since 2010 and continue to decrease. The shrimping industry's answer to this problem has been to deploy more (and larger) boats that deploy ever-larger nets, which has in the short-term been successful at maintaining global shrimp yields. However, this benefit cannot continue forever, as eventually global demand has the potential of outstripping the oceans' ability to maintain the natural ecosystem's balance, resulting in a permanent decline in yields. When taken in light of global population growth and the ever-increasing demand for nutrient-rich foods such as shrimp, this is clearly an unsustainable production paradigm.

Shrimp farming, known in the industry as "aquaculture," has ostensibly stepped in to fill this demand/supply imbalance. Shrimp farming is typically done in open-air lagoons and man-made shrimp ponds connected to the open ocean. Because these ponds constantly exchange water with the adjacent sea, the farmers are able to maintain the water chemistry that allows the shrimp to prosper. However, this method of cultivating shrimp also carries severe ecological peril. First of all, most shrimp farming is primarily conducted in developing countries, where poor shrimp farmers have little regard for the global ecosystem. Because of this, these farmers use large quantities of antibiotics and other chemicals that maximize each farm's chance of producing a crop, putting the entire system at risk. For example, a viral infection that crops up in one farm can spread to all nearby farms, quite literally wiping out an entire region's production. In 1999, the White Spot virus invaded shrimp farms in at least five Latin American countries: Honduras, Nicaragua, Guatemala, Panama and Ecuador and in 2013-14 EMS (Early Mortality Syndrome) wiped out most of the Asia Pacific region and Mexico. Secondly, there is also a finite amount of coastline that can be used for shrimp production – eventually shrimp farms that are dependent on the open ocean will have nowhere to expand. Again, this is an ecologically damaging and ultimately unsustainable system for producing shrimp.

In both the cases, the current method of shrimp production is unsustainable. As global populations rise and the demand for shrimp continues to grow, the current system is bound to fall short. Shrimp trawling cannot continue to increase production without completely depleting the oceans' natural shrimp population. Trends in per-boat yield confirm that this industry has already crossed the overfishing threshold, putting the global open-ocean shrimp population in decline. While open-air shrimp aquaculture may seem to address this problem, it is also an unsustainable system that destroys coastal ecological systems and produces shrimp with very high chemical contamination levels. Closed-system shrimp farming is clearly a superior alternative, but its unique challenges have prevented it from becoming a widely-available alternative – until now.

Of the 1.7 billion pounds of shrimp consumed annually in the United States, over 1.3 billion pounds are imported – much of this from developing countries' shrimp farms. These farms are typically located in developing countries and use high levels of antibiotics and pesticides that are not allowed under USDA regulations. As a result, these shrimp farms produce chemical-laden shrimp in an ecologically unsustainable way.

Unfortunately, most consumers here in the United States are not aware of the origin of their store-bought shrimp or worse, that which they consume in restaurants. This is due to a USDA rule that states that only bulk-packaged shrimp must state the shrimp's country of origin; any "prepared" shrimp, which includes arrangements sold in grocery stores and seafood markets, as well as all shrimp served in restaurants, can simply be sold "as is." Essentially, this means that most U.S. consumers may be eating shrimp laden with chemicals and antibiotics. NaturalShrimp's product is free of pesticide chemicals and antibiotics, a fact that we believe is highly attractive and beneficial in terms of our eventual marketing success.

Technology

Intensive, Indoor, Closed-System Shrimp Production Technology

Historically, efforts to raise shrimp in a high-density, closed system at the commercial level have been met with either modest success or outright failure through “BioFloc Technology”. Infectious agents such as parasites, bacteria and viruses are the most damaging and most difficult to control. Bacterial infection can in some cases be combated through the use of antibiotics (although not always), and in general, the use of antibiotics is considered undesirable and counter to “green” cultivation practices. Viruses can be even worse, in that they are immune to antibiotics. Once introduced to a shrimp population, viruses can wipe out entire farms and shrimp populations, even with intense probiotic applications.

Our primary solution against infectious agents is our “Vibrio Suppression Technology”. We believe this system creates higher sustainable densities, consistent production, improved growth and survival rates and improved food conversion without the use of antibiotics, probiotics or unhealthy anti-microbial chemicals. Vibrio Suppression Technology helps to exclude and suppress harmful organisms that usually destroy “BioFloc” and other enclosed technologies.

Automated Monitoring and Control System

The Company’s “Automated Monitoring and Control System” uses individual tank monitors to automatically control the feeding, oxygenation, and temperature of each of the facility tanks independently. In addition, a facility computer running custom software communicates with each of the controllers and performs additional data acquisition functions that can report back to a supervisory computer from anywhere in the world. These computer-automated water controls optimize the growing conditions for the shrimp as they mature to harvest size, providing a disease-resistant production environment.

The principal theories behind the Company’s system are characterized as:

- High-density shrimp production
- Weekly production
- Natural ecology system
- Regional production
- Regional distribution

These principles form the foundation for the Company and our potential distributors so that consumers can be provided with continuous volumes of live and fresh shrimp at competitive prices.

Research and Development

In 2001, the Company began research and development (R&D) of a high density, natural aquaculture system that is not dependent on ocean water to provide quality, fresh shrimp every week, fifty-two weeks a year. The initial NaturalShrimp system was successful but the Company determined that it would not be economically feasible due to high operating costs. Over the next several years, using the knowledge we gained from the first R&D system, we developed a shrimp production system that eliminated the high costs associated with the previous system. We have continued to refine this technology, eliminating bacteria and other problems that affect enclosed systems and now have a successful shrimp growing process.

We have produced thousands of pounds of shrimp over the last few years in order to develop a design that will consistently produce quality shrimp that grow to a large size at a specific rate of growth. This included experimenting with various types of natural live and synthesized feed supplies before selecting the most appropriate nutritious and reliable combination. It also included utilizing monitoring and control automation equipment to minimize labor costs and to provide the necessary oversight for proper regulation of the shrimp environment.

After the implementation of the first R&D facility in La Coste, Texas, the Company has also made significant improvements that minimize the transfer of shrimp, which will reduce shrimp stress and labor costs. Our current system consists of a reception tank where the shrimp are acclimated, then moved to a larger grow-out tank for the rest of the twenty-four week cycle.

On September 7, 2016, we entered into a Letter of Commitment with Trane, Inc. (“Trane”), a division of Ingersoll-Rand Plc, whereby Trane shall proceed with a detailed audit to use data to verify the capabilities of an initial Phase 1 prototype of a Trane-proposed three tank system at our La Coste, Texas facility. The prototype consists of a modified Electrocoagulation (EC) system for the human grow-out, harvesting and processing of fully mature, antibiotic-free Pacific White Leg shrimp. Trane was authorized to proceed with such detailed audit to utilize data for purposes of verifying the capabilities of the EC system, including the ammonia and chlorine capture and sequestering and pathogen kill. The detailed audit delivered (i) a report on the inspection of the existing infrastructure determining if proper fit, adequate security, acceptable utility service, environmental protection and equipment sizing are achievable; (ii) provide firm fixed pricing for the EC system, electrode selection and supply, waste removal, ventilation of the off-gassing of the equipment; and (iii) a formalized plan for commissioning and on-site investigation of hardware design to simplify build-out of Phase 2 and future phases. The detailed audit was utilized by RGA Labs to build and install the initial system in La Coste Texas pilot plant the first week of June 2018. Management expects to utilize the results of the detailed audit actual operating data as part of the Company’s financing and underwriting package at the Company’s La Coste, Texas facility. Installation of the system is expected to be provided by an outside general contractor, and lease financing for the system is expected to be provided by an outside leasing firm.

Target Markets and Sales Price

Our goal is to establish production systems and distribution centers in metropolitan areas of the United States, as well as international distribution networks through joint venture partnerships throughout the world. This should allow the Company to capture a significant portion of world shrimp sales by offering locally grown, environmentally “green,” naturally grown, fresh shrimp at competitive wholesale prices.

The United States population is approximately 313 million people with an annual shrimp consumption of 1.3 billion pounds, of which less than 400 million pounds are domestically produced. According to IndexMundi.com, the wholesale price for frozen, commodity grade shrimp has risen 15% since January 2015 (shell-on headless, 26-30 count; which is comparable to our target growth size). With world shrimp problems, this price is expected to rise more in the next few years.

We strive to build a profitable global shrimp production company. We believe our foundational advantage is that we can deliver fresh, organically grown, gourmet-grade shrimp, 52 weeks a year to retail and wholesale buyers in major market areas at competitive, yet premium prices. By locating regional production and distribution centers in close proximity to consumer demand, we can provide a fresh product to customers within 24 hours after harvest, which is unique in the shrimp industry. We can be the “first to market” and perhaps “sole weekly provider” of fresh shrimp and capture as much market share as production capacity can support.

For those customers that want a frozen product, we may be able to provide this in the near future and the product will still be differentiated as a “naturally grown, sustainable seafood” that will meet the increasing demand of socially conscious consumers.

Our patented technology and eco-friendly, bio-secure production processes enable the delivery of a chemical and antibiotic free, locally grown product that lives up to the Company’s mantra: “Always Fresh, Always Natural,” thereby solving the issue of “unsafe” imported seafood.

Product Description

Nearly all of the shrimp consumed today are shipped frozen. Shrimp are typically frozen from six to twenty-four months before consumption. Our system is designed to harvest a different tank each week, which provides for fresh shrimp throughout the year. We strive to create a niche market of “Always Fresh, Always Natural” shrimp. As opposed to many of the foreign shrimp farms, we can also claim that our product is 100% free of antibiotics. The ability to grow shrimp locally, year round allows us to provide this high-end product to specialty grocery stores and upscale restaurants throughout the world. We rotate the stocking and harvesting of our tanks each week, which allows for weekly shrimp harvests. Our product is free of all pollutants and is fed only all-natural feeds.

The seafood industry lacks a consistent “Source Verification” method to track seafood products as they move through countries and customs procedures. With worldwide overfishing leading to declining shrimp freshness and sustainability around the world, it is vital for shrimp providers to be able to realistically identify the source of their product. We have well-managed, sustainable facilities that are able to track shrimp from hatchery to plate using environmentally responsible methods.

Shrimp Growth Period

Our production system is designed to produce shrimp at a harvest size of twenty-one to twenty-five shrimp per pound in a period of twenty-four weeks. The Company currently purchases post-larva shrimp that are approximately ten days old (PL 10). In the future, we plan to build our own hatcheries to control the supply of shrimp to each of our facilities. Our full-scale production systems include grow-out and nursery tanks, projected to produce fresh shrimp fifty-two weeks per year.

Distribution and Marketing

We plan to build these environmentally “green” production systems near major metropolitan areas of the United States. Today, we have one pilot production facility in La Coste, Texas (near San Antonio) and plan to begin construction of a full-scale production facility in La Coste and plans for Nevada and New York. Over the next five years, our plan is to increase construction of new facilities each year. In the fifth year, we plan for a new system to be completed each month, expanding first into the largest shrimp consumption markets of the United States.

Unique Product

We plan to sell and distribute the vast majority of our shrimp production through distributors which have established customers and sufficient capacity to deliver a fresh product within hours following harvest. We believe we have the added advantage of being able to market our shrimp as fresh, natural and locally grown using sustainable, eco-friendly technology, a key differentiation from all existing shrimp producers. Furthermore, we believe that our ability to advertise our product in this manner along with the fact that it is a locally grown product, provides us with a marketing advantage over the competition.

Harvesting, Packaging and Shipment

Each location is projected to include production, harvesting/processing and a general shipping and receiving area, in addition to warehousing space for storage of necessary supplies and products required to grow, harvest, package and otherwise make ready for delivery, a fresh shrimp crop on a weekly basis to consumers in each individual market area within 24 hours following harvest.

The seafood industry lacks a consistent source verification method to track seafood products as they move through countries and customs procedures. With worldwide overfishing leading to declining shrimp freshness and sustainability around the world, it is vital for shrimp providers to be able to realistically identify the source of their product. Our future facilities will be designed to track shrimp from hatchery to plate using environmentally responsible methods.

International

We own one hundred percent of NaturalShrimp Global, Inc. which was formed to create international partnerships. Each international partnership is expected to use the Company's proprietary technology to penetrate shrimp markets throughout the world utilizing existing food service distribution channels.

Because our system is enclosed and also indoors, it is not affected by weather or climate and does not depend on ocean proximity. As such, we believe we will be able to provide, naturally grown, high-quality, fresh shrimp to major market customers each week. This will allow distribution companies to leverage their existing customer relationships by offering an uninterrupted supply of high quality, fresh and locally grown shrimp. We will utilize distributors that currently supply fresh seafood to upscale restaurants, country clubs, specialty super markets and retail stores whose clientele expect and appreciate fresh, natural products.

NaturalShrimp Global, Inc., a wholly owned subsidiary of NaturalShrimp Incorporated., owns a percentage of NaturalShrimp International A.S. in Europe. Our European-based partner, NaturalShrimp International A.S., Oslo, Norway is responsible for the construction cost of their facility and initial operating capital.

The first facility built in Spain for NaturalShrimp International A.S. is GambaNatural de España, S.L. The land for the first facility was purchased in Medina del Campo, Spain and construction of the 75,000 sq. ft. facility was completed in 2016. Medina del Campo is approximately seventy-five miles northwest of Madrid, Spain.

We will seek potential partners throughout open territories as we are able to obtain the adequate funding to complete the first two facilities at the La Coste location.

Go to Market Strategy and Execution

Our strategy is to develop regional production and distribution centers near major metropolitan areas throughout the United States and internationally. Today, we have 53,000 sq. ft. of R&D facilities, which includes, a pilot production system, greenhouse/reservoirs and utility buildings in La Coste, TX (near San Antonio). We intend to begin construction of a new free-standing facility with the next generation shrimp production system in place on the property in 2018.

The reasoning behind building additional shrimp production systems in La Coste is availability of trained production personnel, our research and development team, and an opportunity to develop the footprint and model for additional facilities. Our current plan is to develop six regional production and distribution centers near major markets in 2019, adding one system per month in a selected production center, depending on market demand.

We have sold product to restaurants at \$12.00 per pound and to retail consumers at \$16.50 to \$21.00 per pound, depending on size, which helps to validate our pricing strategy. Additionally, from 2011 to 2013, we had two successful North Texas test markets which distributed thousands of pounds of fresh product to customers within 24 hours following harvest. The fresh product was priced from \$8.40 to \$12.00 per pound wholesale, heads on, net price to the Company.

Current Systems and Expansion

The pilot plant is located in La Coste, Texas and is being retrofitted with new patent-pending technology that the Company has been developing with Trane's engineering audit and F&T Water Solutions, and RGA Labs. This facility, when completely retrofitted with the new technology, is projected to produce approximately 6,000 pounds every month. The next facility in La Coste will be substantially larger than the current system. The target yield of shrimp for the new facility will be approximately 6,000 pounds per week. Both facilities combined are projected to produce over 7,000 pounds of shrimp per week in La Coste. By staging the stocking and harvests from tank to tank, it enables us to produce weekly and therefore deliver fresh shrimp every week.

After the completion of the next system in La Coste, our long-term plan is to build additional production systems in Las Vegas, Chicago and New York. These locations are targeted to begin construction in fiscal 2019, and the funding for these plans are projected to come from profits, agricultural guaranty programs, and investors. These cities are not surrounded by commercial shrimp production and we believe there will be a high demand for fresh shrimp in all of these locations. In addition, the Company will continue to use the land it owns in La Coste to build as many systems as the Texas market demands.

Competition

There are a number of companies conducting research and development projects in their attempt to develop closed-system technologies in the U.S., some with reported production and sales. Florida Organic Aquaculture uses a Bio-Floc Raceway System to intensify shrimp growth, while Marvesta Shrimp Farms tanks in water from the Atlantic to use in their indoor system. Since these are privately-held companies, it is not possible to know, with certainty, their state of technical development, production capacity, need for water exchange, location requirements, financial status and other matters. To the best of our knowledge, none are producing significant quantities of shrimp relative to their local markets, and such fresh shrimp sales are likely confined to an area near the production facility.

Additionally, any new competitor would face significant barriers for entry into the market and would likely need years of research and development to develop the proprietary technology necessary to produce similar shrimp at a commercially viable level. We believe our technology and business model sets us apart from any current competition. It is possible that additional competitors will arise in the future, but with the size and growth of the worldwide shrimp market, many competitors could co-exist and thrive in the fresh shrimp industry.

Intellectual Property

We intend to take appropriate steps to protect our intellectual property. We have registered the trademark "NATURALSHRIMP" which has been approved and was published in the Official Gazette on June 5, 2012. There are potential technical processes for which the Company may be able to file a patent. However, there are no assurances that such applications, if filed, would be issued and no right of enforcement is granted to a patent application. Therefore, the Company has filed a provisional patent with the U.S. Patent Office and plans to use a variety of other methods, including copyright registrations as appropriate, trade secret protection, and confidentiality and non-compete agreements to protect its intellectual property portfolio.

Source and Availability of Raw Materials

Raw materials are received in a timely manner from established suppliers. Currently, we buy our feed from Zeigler, a leading producer of aquatic feed. Post larvae ("PL") shrimp are purchased from Shrimp Improvement Systems (SIS) in Florida and Global Blue Technologies in Texas.

There have not been any issues regarding the availability of our raw materials. We have favorable contacts and past business dealings with other major shrimp feed producers if current suppliers are not available.

Government Approvals and Regulations

We are subject to government regulation and require certain licenses. The following list includes regulations to which we are subject and/or the permits and licenses we currently hold:

- Texas Parks and Wildlife Department (TPWD) - "Exotic species permit" to raise exotic shrimp (non-native to Texas). The La Coste facility is north of the coastal shrimp exclusion zone (east and south of H-35, where it intersects Hwy 21 down to Laredo) and therefore outside of TPWD's major area of concern for exotic shrimp. Currently Active - Expires December 31, 2018.
- Texas Department of Agriculture (TDA) - "Aquaculture License" for aquaculture production facilities. License to "operate a fish farm or cultured fish processing plant." Currently Active - Expires June 30, 2018.
- Texas Commission on Environmental Quality (TCEQ) - Regulates facility wastewater discharge. According to the TCEQ permit classification system, we are rated Level 1 - Recirculation system with no discharge. Currently Active - No expiration.

- San Antonio River Authority - No permit required, but has some authority over any effluent water that could impact surface and ground waters.
- OSHA - No permit required but has right to inspect facility.
- HACCP (Hazard Analysis and Critical Control Point) - Not needed unless we process shrimp on site. Training and preparation of HACCP plans remain to be completed. There are multiple HACCP plans listed at <http://seafood.ucdavis.edu/haccp/Plans.htm> and other web sites that can be used as examples.
- Texas Department of State Health Services - Food manufacturer license # 1011080.
- Aquaculture Certification Council (ACC) and Best Aquaculture Practices (BAP) - Provide shrimp production certification for shrimp marketing purposes to mainly well-established vendors. ACC and BAP certifications require extensive record keeping. No license is required at this time.

We are subject to certain regulations regarding the need for field employees to be certified. We strictly adhere to these regulations. The cost of certification is an accepted part of expenses. Regulations may change and become a cost burden, but compliance and safety are our main concern.

Market Advantages and Corporate Drivers

The following are what we consider to be our advantages in the marketplace:

- Early-mover Advantage: Commercialized technology in a large growing market with no significant competition yet identified. Most are early stage start-ups or early stage companies with limited production and distribution.
- Farm-to-Market: This has significant advantages including reduced transportation costs and a product that is more attractive to local consumers.
- Bio-secured Building: Our process is a re-circulating, highly-filtered water technology in an indoor-regulated environment. External pathogens are excluded.
- Eco-friendly “Green” Technology: Our closed-loop, re-circulating system has no ocean water exchange requirements, does not use chemical or antibiotics and therefore is sustainable, eco-friendly, environmentally sound and produces a superior quality shrimp that is totally natural.
- Availability of Weekly Fresh Shrimp: Assures consumers of optimal freshness, taste, and texture of product which will command premium prices.
- Sustainability: Our naturally grown product does not deplete wild supplies, has no by-catch kill of marine life, does not damage sensitive ecological environments and avoids potential risks of imported seafood.

Subsidiaries

The Company has three wholly-owned subsidiaries including NaturalShrimp Corporation, NaturalShrimp Global, Inc. and Natural Aquatic Systems, Inc.

Employees

As of March 31, 2018, we had 4 full-time employees. We intend to hire additional staff and to engage consultants in general administration on an as-needed basis. We also intend to engage experts in general business to advise us in various capacities.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below together with all of the other information included in our public filings before making an investment decision with regard to our securities. The statements contained in or incorporated into this document that are not historic facts are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those set forth in or implied by forward-looking statements. If any of the following events described in these risk factors actually occur, our business, financial condition or results of operations could be harmed. In that case, the trading price of our common stock could decline, and you may lose all or part of your investment. Moreover, additional risks not presently known to us or that we currently deem less significant also may impact our business, financial condition or results of operations, perhaps materially. For additional information regarding risk factors, see Item 1 – “Forward-Looking Statements.”

Risks Related to Our Business and Industry

The market for our product may be limited, and as a result our business may be adversely affected.

The feasibility of marketing our product has been assumed to this point and there can be no assurance that such assumptions are correct. It is possible that the costs of development and implementation of our shrimp production technology may be too expensive to market our shrimp at a competitive price. It is likewise possible that competing technologies will be introduced into the marketplace before or after the introduction of our product to the market, which may affect our ability to market our product at a competitive price.

Furthermore, there can be no assurance that the prices we determine to charge for our product will be commercially acceptable or that the prices that may be dictated by the market will be sufficient to provide to us sufficient revenues to profitably operate and provide a financial return to our investors.

Our business and operations are affected by the volatility of prices for shrimp.

Our business, prospects, revenues, profitability and future growth are highly dependent upon the prices of and demand for shrimp. Our ability to borrow and to obtain additional capital on attractive terms is also substantially dependent upon shrimp prices. These prices have been and are likely to continue to be extremely volatile for seasonal, cyclical and other reasons. Any substantial or extended decline in the price of shrimp will have a material adverse effect on our financing capacity and our prospects for commencing and sustaining any economic commercial production. In addition, increased availability of imported shrimp can affect our business by lowering commodity prices. This could reduce the value of inventories, held both by us and by our customers, and cause many of our customers to reduce their orders for new products until they can dispose of their higher cost inventories.

Market demand for our products may decrease.

We face competition from other producers of seafood as well as from other protein sources, such as pork, beef and poultry. The bases on which we expect to compete include, but may not be limited to:

- price;
- product quality;
- brand identification; and
- customer service.

Demand for our products will be affected by our competitors’ promotional spending. We may be unable to compete successfully on any or all of these bases in the future, which may have a material adverse effect on our revenues and results of operations.

Moreover, although historically the logistics and perishability of seafood has led to regionalized competition, the market for fresh and frozen seafood is becoming increasingly globalized as a result of improved delivery logistics and improved preservation of the products. Increased competition, consolidation, and overcapacity may lead to lower product pricing of competing products that could reduce demand for our products and have a material adverse effect on our revenues and results of operations.

Competition and unforeseen limited sources of supplies in the industry may result in occasional spot shortages of equipment, supplies and materials. In particular, we may experience possible unavailability of post-larvae and materials and services used in our shrimp production facilities. Such unavailability could result in increased costs and delays to our operations. If we cannot find the products, equipment, supplies and materials that we need on a timely basis, we may have to suspend our production plans until we find the products, equipment and materials that we need.

If we lose our key management and technical personnel, our business may be adversely affected.

In carrying out our operations, we will rely upon a small group of key management and technical personnel including our Chief Executive Officer, Chairman of the Board and President and Chief Financial Officer. We do not currently maintain any key man insurance. An unexpected partial or total loss of the services of these key individuals could be detrimental to our business.

Our expansion plans for our shrimp production facilities reflects our current intent and is subject to change.

Our current plans regarding expansion of our shrimp production facilities are subject to change. Whether we ultimately undertake our expansion plans will depend on the following factors, among others:

- availability and cost of capital;
- current and future shrimp prices;
- costs and availability of post-larvae shrimp, equipment, supplies and personnel necessary to conduct these operations;
- success or failure of system design and activities in similar areas;
- changes in the estimates of the costs to complete production facilities;
- and
- decisions of operators and future joint venture partners.

We will continue to gather data about our production facilities, and it is possible that additional information may cause us to alter our schedule or determine that a certain facility should not be pursued at all.

Our product is subject to regulatory approvals and if we fail to obtain such approvals, our business may be adversely affected.

Most of the jurisdictions in which we operate will require us to obtain a license for each facility owned and operated in that jurisdiction. We have obtained and currently hold a license to own and operate each of our facilities where a license is required. In order to maintain the licenses, we have to operate our current farms and, if we pursue acquisitions or construction of new farms, we will need to obtain additional licenses to operate those farms, where required. We are also exposed to dilution of the value of our licenses where a government issues new licenses to fish farmers other than us, thereby reducing the current value of our fish farming licenses. Governments may change the way licenses are distributed or otherwise dilute or invalidate our licenses. If we are unable to maintain or obtain new fish farming licenses or if new licensing regulations dilute the value of our licenses, this may have a material adverse effect on our business.

It is possible that regulatory authorities could make changes in regulatory rules and policies and we would not be able to market or commercialize our product in the intended manner and/or the changes could adversely impact the realization of our technology or market potential.

Failure to ensure food safety and compliance with food safety standards could result in serious adverse consequences for us.

As our end products are for human consumption, food safety issues (both actual and perceived) may have a negative impact on the reputation of and demand for our products. In addition to the need to comply with relevant food safety regulations, it is of critical importance that our products are safe and perceived as safe and healthy in all relevant markets.

Our products may be subject to contamination by food-borne pathogens, such as *Listeria monocytogenes*, *Clostridia*, *Salmonella* and *E. Coli* or contaminants. These pathogens and substances are found in the environment; therefore, there is a risk that one or more of these organisms and pathogens can be introduced into our products as a result of improper handling, poor processing hygiene or cross-contamination by us, the ultimate consumer or any intermediary. We have little, if any, control over handling procedures once we ship our products for distribution. Furthermore, we may not be able to prevent contamination of our shrimp by pollutants such as polychlorinated biphenyls, or PCBs, dioxins or heavy metals.

An inadvertent shipment of contaminated products may be a violation of law and may lead to product liability claims, product recalls (which may not entirely mitigate the risk of product liability claims), increased scrutiny and penalties, including injunctive relief and plant closings, by regulatory agencies, and adverse publicity.

Increased quality demands from authorities in the future relating to food safety may have a material adverse effect on our business, financial condition, results of operations or cash flow. Legislation and guidelines with tougher requirements are expected and may imply higher costs for the food industry. In particular, the ability to trace products through all stages of development, certification and documentation is becoming increasingly required under food safety regulations. Further, limitations on additives and use of medical products in the farmed shrimp industry may be imposed, which could result in higher costs for us.

The food industry, in general, experiences high levels of customer awareness with respect to food safety and product quality, information and traceability. We may fail to meet new and exacting customer requirements, which could reduce demand for our products.

Our success is dependent upon our ability to commercialize our shrimp production technology.

We plan to commence limited commercial operations in six to nine months after the first post larvae (PL) arrive from the hatchery by the end of June 2018 to begin producing and shipping shrimp. Until then, we will have been engaged principally in the research and development of the NaturalShrimp technology. Therefore, we have a limited operating history upon which an evaluation of our prospects can be made. Our prospects must be considered in light of the risk, uncertainties, expenses, delays and difficulties associated with the establishment of a new business in the evolving food industry, as well as those risks encountered in the shift from development to commercialization of new technology and products or services based upon such technology.

We have developed our first commercial system that employs the NaturalShrimp technology but additional work is required to incorporate that technology into a system capable of accommodating thousands of customers, which is the minimum capability we believe is necessary to compete in the marketplace.

Our shrimp production technology may not operate as intended.

Although we have successfully tested our NaturalShrimp technology, our approach, which is still fairly new in the industry, may not operate as intended or may be subject to other factors that we have not yet considered. These may include the impact of new pathogens or other biological risks, low oxygen levels, algal blooms, fluctuating seawater temperatures, predation or escapes. Any of the foregoing may result in physical deformities to our shrimp or affect our ability to increase shrimp production, which may have a material adverse effect on our operations.

Our success is dependent upon our ability to protect our intellectual property.

Our success will depend in part on our ability to obtain and enforce protection for our intellectual property in the United States and other countries. It is possible that our intellectual property protection could fail. It is possible that the claims for patents or other intellectual property protections could be denied or invalidated or that our protections will not be sufficiently broad to protect our technology. It is also possible that our intellectual property will not provide protection against competitive products, or will not otherwise be commercially viable.

Our commercial success will depend in part on our ability to commercialize our shrimp production without infringing on patents or proprietary rights of others. We cannot guarantee that other companies or individuals have not or will not independently develop substantially equivalent proprietary rights or that other parties have not or will not be issued patents that may prevent the sale of our products or require licensing and the payment of significant fees or royalties in order for us to be able to carry on our business.

As the owner of real estate, we are subject to risks under environmental laws, the cost of compliance with which and any violation of which could materially adversely affect us.

Our operating expenses could be higher than anticipated due to the cost of complying with existing and future laws and regulations. Various environmental laws may impose liability on the current or prior owner or operator of real property for removal or remediation of hazardous or toxic substances. Current or prior owners or operators may also be liable for government fines and damages for injuries to persons, natural resources and adjacent property. These environmental laws often impose liability whether or not the owner or operator knew of, or was responsible for, the presence or disposal of the hazardous or toxic substances. The cost of complying with environmental laws could materially adversely affect our results of operations, and such costs could exceed the value of our facility. In addition, the presence of hazardous or toxic substances, or the failure to properly manage, dispose of or remediate such substances, may adversely affect our ability to use, sell or rent our property or to borrow using our property as collateral which, in turn, could reduce our revenue and our financing ability. We have not engaged independent environmental consultants to assess the likelihood of any environmental contamination or liabilities and have not obtained a Phase I environmental assessment on our property. However, even if we did obtain a Phase I environmental assessment report, such reports are limited in scope and may not reveal all existing material environmental contamination.

Risks Related to Financing Our Business

Our independent registered public accounting firm has issued its audit opinion on our consolidated financial statements appearing in our annual report on Form 10-K, including an explanatory paragraph as to substantial doubt with the respect to our ability to continue as a going concern.

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, assuming we will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. For the year ended March 31, 2018, we had a net loss of approximately \$5,285,000. At March 31, 2018, we had an accumulated deficit of approximately \$34,013,000 and a working capital deficit of approximately \$6,764,000. These factors raise substantial doubt about our ability to continue as a going concern, within one year from the issuance date of this filing. Our ability to continue as a going concern is dependent on our ability to raise the required additional capital or debt financing to meet short and long-term operating requirements. We may also encounter business endeavors that require significant cash commitments or unanticipated problems or expenses that could result in a requirement for additional cash. If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our current shareholders could be reduced, and such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of prospective business endeavors or opportunities, which could significantly and materially restrict our operations. If we are unable to obtain the necessary capital, we may have to cease operations.

Expansion of our operations will require significant capital expenditures for which we may be unable to obtain sufficient financing.

Our need for additional capital may adversely affect our financial condition. We have no sustained history of earnings and have operated at a loss since we commenced business. We have relied, and continue to rely, on external sources of financing to meet our capital requirements, to continue developing our proprietary technology, to build our production facilities, and to otherwise implement our corporate development and investment strategies.

We plan to obtain the future funding that we will need through the debt and equity markets but there can be no assurance that we will be able to obtain additional funding when it is required. If we fail to obtain the funding that we need when it is required, we may have to forego or delay potentially valuable opportunities to build shrimp production facilities or default on existing funding commitments to third parties. Our limited operating history may make it difficult to obtain future financing.

Our ability to generate positive cash flows is uncertain.

To develop and expand our business, we will need to make significant up-front investments in our manufacturing capacity and incur research and development, sales and marketing and general and administrative expenses. In addition, our growth will require a significant investment in working capital. Our business will require significant amounts of working capital to meet our production requirements and support our growth.

We cannot provide any assurance that we will be able to raise the capital necessary to meet these requirements. If adequate funds are not available or are not available on satisfactory terms, we may be required to significantly curtail our operations and may not be able to fund our current production requirements - let alone fund expansion, take advantage of unanticipated acquisition opportunities, develop or enhance our products, or respond to competitive pressures. Any failure to obtain such additional financing could have a material adverse effect on our business, results of operations and financial condition.

Because we may never have net income from our operations, our business may fail.

We have no history of revenues and profitability from operations. There can be no assurance that we will ever operate profitably. Our success is significantly dependent on uncertain events, including successful development of our technology, establishing satisfactory manufacturing arrangements and processes, and distributing and selling our products.

Before receiving revenues from sales to customers of our products, we anticipate that we will incur increased operating expenses without realizing any revenues. We therefore expect to incur significant losses. If we are unable to generate significant revenues from sales of our products, we will not be able to earn profits or continue operations. We can provide no assurance that we will generate any revenues or ever achieve profitability. If we are unsuccessful in addressing these risks, our business will fail and investors may lose all of their investment in our Company.

We need to raise additional funds and such funds may not be available on acceptable terms or at all.

We may consider issuing additional debt or equity securities in the future to fund our business plan, for potential acquisitions or investments, or for general corporate purposes. If we issue equity or convertible debt securities to raise additional funds, our existing stockholders may experience dilution, and the new equity or debt securities may have rights, preferences and privileges senior to those of our existing stockholders. If we incur additional debt, it may increase our leverage relative to our earnings or to our equity capitalization, requiring us to pay additional interest expenses. We may not be able to obtain financing on favorable terms, or at all, in which case, we may not be able to develop or enhance our products, execute our business plan, take advantage of future opportunities or respond to competitive pressures.

Our margins fluctuate which leads to further uncertainty in our profitability model.

While we will have the potential ability to negotiate prices that benefit our clients and affect our profitability as it garners market-share and increases our book of business, margins in the aquaculture business are fluid, and our margins vary based upon production volume and the customer. This may lead to continued uncertainty in margins from quarter to quarter.

Our operations in foreign countries are subject to political, economic, legal and regulatory risks.

The following aspects of political, economic, legal and regulatory systems in foreign countries create uncertainty with respect to many of the legal and business decisions that we make:

- cancellation or renegotiation of contracts due to uncertain enforcement and recognition procedures of judicial decisions;
- disadvantages of competing against companies from countries that are not subject to U.S. laws and regulations, including the Foreign Corrupt Practices Act;
- changes in foreign laws or regulations that adversely impact our business;
- changes in tax laws that adversely impact our business, including, but not limited to, increases in the tax rates and retroactive tax claims;
- royalty and license fee increases;
- expropriation or nationalization of property;
- currency fluctuations;
- foreign exchange controls;
- import and export regulations;
- changes in environmental controls;
- risks of loss due to civil strife, acts of war and insurrection; and
- other risks arising out of foreign governmental sovereignty over the areas in which our operations are conducted.

Consequently, our development and production activities in foreign countries may be substantially affected by factors beyond our control, any of which could materially adversely affect our business, prospects, financial position and results of operations. Furthermore, in the event of a dispute arising from our operations in other countries, we may be subject to the exclusive jurisdiction of courts outside the United States or may not be successful in subjecting non-U.S. persons or entities to the jurisdiction of the courts in the United States, which could adversely affect the outcome of a dispute.

The cost of complying with governmental regulations in foreign countries may adversely affect our business operations.

We may be subject to various governmental regulations in foreign countries. These regulations may change depending on prevailing political or economic conditions. In order to comply with these regulations, we believe that we may be required to obtain permits for producing shrimp and file reports concerning our operations. These regulations affect how we carry on our business, and in order to comply with them, we may incur increased costs and delay certain activities pending receipt of requisite permits and approvals. If we fail to comply with applicable regulations and requirements, we may become subject to enforcement actions, including orders issued by regulatory or judicial authorities requiring us to cease or curtail our operations, or take corrective measures involving capital expenditures, installation of additional equipment or remedial actions. We may be required to compensate third parties for loss or damage suffered by reason of our activities, and may face civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permits governing our operations and activities could affect us in a materially adverse way and could force us to increase expenditures or abandon or delay the development of shrimp production facilities.

Our international operations will involve the use of foreign currencies, which will subject us to exchange rate fluctuations and other currency risks.

Currently, we have no revenues from international operations. In the future, however, any revenues and related expenses of our international operations will likely be generally denominated in local currencies, which will subject us to exchange rate fluctuations between such local currencies and the U.S. dollar. These exchange rate fluctuations will subject us to currency translation risk with respect to the reported results of our international operations, as well as to other risks sometimes associated with international operations. In the future, we could experience fluctuations in financial results from our operations outside of the United States, and there can be no assurance we will be able, contractually or otherwise, to reduce the currency risks associated with our international operations.

Our insurance coverage may be inadequate to cover all significant risk exposures.

We will be exposed to liabilities that are unique to the products we provide. While we intend to maintain insurance for certain risks, the amount of our insurance coverage may not be adequate to cover all claims or liabilities, and we may be forced to bear substantial costs resulting from risks and uncertainties of our business. It is also not possible to obtain insurance to protect against all operational risks and liabilities. The failure to obtain adequate insurance coverage on terms favorable to us, or at all, could have a material adverse effect on our business, financial condition and results of operations. We do not have any business interruption insurance. Any business disruption or natural disaster could result in substantial costs and diversion of resources.

Risks Related to Ownership of our Common Stock

We have limited capitalization and may require financing, which may not be available.

We have limited capitalization, which increases our vulnerability to general adverse economic and industry conditions, limits our flexibility in planning for or reacting to changes in our business and industry and may place us at a competitive disadvantage to competitors with sufficient or excess capitalization. If we are unable to obtain sufficient financing on satisfactory terms and conditions, we will be forced to curtail or abandon our plans or operations. Our ability to obtain financing will depend upon a number of factors, many of which are beyond our control.

A limited public trading market exists for our common stock, which makes it more difficult for our stockholders to sell their common stock in the public markets. Any trading in our shares may have a significant effect on our stock prices.

Although our common stock is listed for quotation on the OTC Marketplace, QB Tier, under the symbol "SHMP", the trading volume of our stock is limited and a market may not develop or be sustained. As a result, any trading price of our common stock may not be an accurate indicator of the valuation of our common stock. Any trading in our shares could have a significant effect on our stock price. If a more liquid public market for our common stock does not develop, then investors may not be able to resell the shares of our common stock that they have purchased and may lose all of their investment. No assurance can be given that an active market will develop or that a stockholder will ever be able to liquidate its shares of common stock without considerable delay, if at all. Many brokerage firms may not be willing to effect transactions in the securities. Even if an investor finds a broker willing to effect a transaction in our securities, the combination of brokerage commissions, state transfer taxes, if any, and any other selling costs may exceed the selling price. Furthermore, our stock price may be impacted by factors that are unrelated or disproportionate to our operating performance. These market fluctuations, as well as general economic, political and market conditions, such as recessions, interest rates or international currency fluctuations may adversely affect the market price and liquidity of our common stock.

Our stock price may be volatile.

The market price of our common stock is likely to be highly volatile and could fluctuate widely in price in response to various factors, many of which are beyond our control, including the following:

- our stock being held by a small number of persons whose sales (or lack of sales) could result in positive or negative pricing pressure on the market price for our common stock;
- actual or anticipated variations in our quarterly operating results;
- changes in our earnings estimates;
- our ability to obtain adequate working capital financing;
- changes in market valuations of similar companies;
- publication (or lack of publication) of research reports about us;
- changes in applicable laws or regulations, court rulings, enforcement and legal actions;
- loss of any strategic relationships;
- additions or departures of key management personnel;
- actions by our stockholders (including transactions in our shares);
- speculation in the press or investment community;
- increases in market interest rates, which may increase our cost of capital;
- changes in our industry;
- competitive pricing pressures;
- our ability to execute our business plan; and
- economic and other external factors.

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our common stock.

Our stock is categorized as a penny stock. Trading of our stock may be restricted by the SEC's penny stock regulations which may limit a stockholder's ability to buy and sell our stock.

Our stock is categorized as a "penny stock", as that term is defined in SEC Rule 3a51-1, which generally provides that "penny stock", is any equity security that has a market price (as defined) less than US\$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, including Rule 15g-9, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and accredited investors. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities and reduces the number of potential investors. We believe that the penny stock rules discourage investor interest in and limit the marketability of our common stock.

According to SEC Release No. 34-29093, the market for “penny stocks” has suffered in recent years from patterns of fraud and abuse. Such patterns include: (1) control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer; (2) manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases; (3) boiler room practices involving high-pressure sales tactics and unrealistic price projections by inexperienced sales persons; (4) excessive and undisclosed bid-ask differential and markups by selling broker-dealers; and (5) the wholesale dumping of the same securities by promoters and broker-dealers after prices have been manipulated to a desired level, along with the resulting inevitable collapse of those prices and with consequent investor losses. The occurrence of these patterns or practices could increase the future volatility of our share price.

FINRA sales practice requirements may also limit a stockholder’s ability to buy and sell our stock.

In addition to the “penny stock” rules described above, FINRA has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer’s financial status, tax status, investment objectives and other information. Under interpretations of these rules, FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock and have an adverse effect on the market for our shares.

To date, we have not paid any cash dividends and no cash dividends will be paid in the foreseeable future.

We do not anticipate paying cash dividends on our common stock in the foreseeable future and we may not have sufficient funds legally available to pay dividends. Even if the funds are legally available for distribution, we may nevertheless decide not to pay any dividends. We presently intend to retain all earnings for our operations.

The existence of indemnification rights to our directors, officers and employees may result in substantial expenditures by our Company and may discourage lawsuits against our directors, officers and employees.

Our bylaws contain indemnification provisions for our directors, officers and employees, and we have entered into indemnification agreements with our officer and directors. The foregoing indemnification obligations could result in us incurring substantial expenditures to cover the cost of settlement or damage awards against directors and officers, which we may be unable to recoup. These provisions and resultant costs may also discourage us from bringing a lawsuit against directors and officers for breaches of their fiduciary duties, and may similarly discourage the filing of derivative litigation by our stockholders against our directors and officers even though such actions, if successful, might otherwise benefit us and our stockholders.

If we fail to develop or maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent financial fraud. As a result, current and potential stockholders could lose confidence in our financial reporting.

We are subject to the risk that sometime in the future, our independent registered public accounting firm could communicate to the board of directors that we have deficiencies in our internal control structure that they consider to be “significant deficiencies.” A “significant deficiency” is defined as a deficiency, or a combination of deficiencies, in internal controls over financial reporting such that there is more than a remote likelihood that a material misstatement of the entity’s financial statements will not be prevented or detected by the entity’s internal controls.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide reliable financial reports or prevent fraud, we could be subject to regulatory action or other litigation and our operating results could be harmed. We are required to document and test our internal control procedures to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act” or “SOX”), which requires our management to annually assess the effectiveness of our internal control over financial reporting.

We currently are not an “accelerated filer” as defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended. Section 404 of the Sarbanes-Oxley Act of 2002 (“Section 404”) requires us to include an internal control report with our Annual Report on Form 10-K. That report must include management’s assessment of the effectiveness of our internal control over financial reporting as of the end of the fiscal year. This report must also include disclosure of any material weaknesses in internal control over financial reporting that we have identified. As of March 31, 2018, the management of the Company assessed the effectiveness of the Company’s internal control over financial reporting based on the criteria for effective internal control over financial reporting established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) and SEC guidance on conducting such assessments. Management concluded, during the fiscal year ended March 31, 2018, that the Company’s internal controls and procedures were not effective to detect the inappropriate application of U.S. GAAP rules. Management realized there were deficiencies in the design or operation of the Company’s internal control that adversely affected the Company’s internal controls which management considers to be material weaknesses. A material weakness in the effectiveness of our internal controls over financial reporting could result in an increased chance of fraud and the loss of customers, reduce our ability to obtain financing and require additional expenditures to comply with these requirements, each of which could have a material adverse effect on our business, results of operations and financial condition. For additional information, see Item 9A – Controls and Procedures.

Our intended business, operations and accounting are expected to be substantially more complex than they have been in the past. It may be time consuming, difficult and costly for us to develop and implement the internal controls and reporting procedures required by the Sarbanes-Oxley Act. We may need to hire additional financial reporting, internal controls and other finance personnel in order to develop and implement appropriate internal controls and reporting procedures. If we are unable to comply with the internal controls requirements of the Sarbanes-Oxley Act, then we may not be able to obtain the independent accountant certifications required by such act, which may preclude us from keeping our filings with the SEC current.

If we are unable to maintain the adequacy of our internal controls, as those standards are modified, supplemented, or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal control over financial reporting in accordance with Section 404. Failure to achieve and maintain an effective internal control environment could cause us to face regulatory action and cause investors to lose confidence in our reported financial information, either of which could adversely affect the value of our common stock.

As a public company, we will incur significant increased operating costs and our management will be required to devote substantial time to new compliance initiatives.

Although our management has significant experience in the food industry, it has only limited experience operating the Company as a public company. To operate effectively, we will be required to continue to implement changes in certain aspects of our business and develop, manage and train management level and other employees to comply with on-going public company requirements. Failure to take such actions, or delay in the implementation thereof, could have a material adverse effect on our business, financial condition and results of operations.

The Sarbanes-Oxley Act, as well as rules subsequently implemented by the SEC, imposes various requirements on public companies, including requiring establishment and maintenance of effective disclosure and financial controls and changes in corporate governance practices. Our management and other personnel will need to devote a substantial amount of time to these new compliance initiatives. Moreover, these rules and regulations will increase our legal and financial compliance costs and will make some activities more time-consuming and costly.

Our independent registered public accounting firm has issued its audit opinion on our consolidated financial statements appearing in our annual report on Form 10-K, including an explanatory paragraph as to substantial doubt with the respect to our ability to continue as a going concern.

The report of Turner, Stone & Company, our independent registered public accounting firm, with respect to our consolidated financial statements and the related notes for the fiscal year ended March 31, 2018, indicates that there was substantial doubt about our ability to continue as a going concern. Our financial statements do not include any adjustments that might result from this uncertainty. For additional information, see Item 7 – Management’s Discussion and Analysis of Financial Condition and Results of Operations – “Going Concern.”

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not Applicable.

ITEM 2. PROPERTIES

Our principal offices are located at 15150 Preston Road, Suite 300, Dallas, TX, where we pay \$550 per month under an operating lease that expired on July 31, 2018. The Company expects to renew this lease for the foreseeable future.

We also own a pilot-production facility at 833 County Road 583, Medina, TX, which consists of a 32,760 square foot production facility on 37 acres.

We own no other properties.

Our registered agent is Business Filings Incorporated, located at 701 S. Carson Street, Suite 200, Carson City, Nevada 89701.

ITEM 3. LEGAL PROCEEDINGS

We know of no material proceedings in which any of our directors, officers or affiliates, or any registered or beneficial stockholder is a party adverse to our company or our subsidiaries or has a material interest adverse to our company or our subsidiaries.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is quoted on the OTC Markets, QB Tier, under the symbol “SHMP.” The closing price of our common stock on July 11, 2018 was \$0.0175 per share. Set forth below are the range of high and low bid quotations for the period indicated as reported by the OTC Markets Group (www.otcmarkets.com). The market quotations reflect inter-dealer prices, without retail mark-up, mark-down or commissions and may not necessarily represent actual transactions.

Quarter Ended	Bid High	Bid Low
March 31, 2018	\$ 0.21	\$ 0.05
December 31, 2017	\$ 1.00	\$ 0.07
September 30, 2017	\$ 0.44	\$ 0.13
June 30, 2017	\$ 0.45	\$ 0.32
March 31, 2017	\$ 0.60	\$ 0.31
December 31, 2016	\$ 0.62	\$ 0.22
September 30, 2016	\$ 0.83	\$ 0.28
June 30, 2016	\$ 0.52	\$ 0.05

Transfer Agent

Our transfer agent is Island Stock Transfer, Inc., and is located at 15500 Roosevelt Boulevard, Suite 301, Clearwater, Florida 33760. Their telephone number is (727) 289-0010.

Holders of Common Stock

As of July 11, 2018, there were 86 shareholders of record of our common stock. As of such date, 92,408,298 shares were issued and outstanding.

Dividends

We have never declared or paid any cash dividends on our common stock. We currently intend to retain future earnings, if any, to increase our working capital and do not anticipate paying any cash dividends in the foreseeable future.

Securities Authorized for Issuance Under Equity Compensation Plans

There were no equity compensation plans formally approved by the shareholders of the Company as of March 31, 2018.

Convertible Debentures

On January 23, 2017, the Company entered into a Securities Purchase Agreement and issued a Convertible Note in the original principal amount of \$262,500 to an accredited investor, along with a Warrant to purchase 350,000 shares of the Company's common stock, in exchange for a purchase price of \$250,000. The Company received \$50,000 upon closing, with additional consideration to be paid to the Company in such amounts and at such dates as the holder may choose in its sole discretion. The warrants are exercisable over a period of five (5) years at an exercise price of \$0.60, subject to adjustment. The exercise price was adjusted to \$0.15, and the warrants issued increased to 280,000, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. The note is convertible into shares of the Company's common stock at a conversion price of \$0.35 per share, subject to adjustment. The maturity date of the note shall be two years from the date of each payment of consideration thereunder. A one-time interest charge of twelve percent (12%) shall be applied on the issuance date and payable on the maturity date. During the year ended March 31, 2018, the holder converted the \$50,000 of the January debentures to common shares of the Company.

On March 28, 2017, the Company entered into a Securities Purchase Agreement with an accredited investor related to the purchase and sale of certain convertible debentures in the aggregate principal amount of up to \$400,000 for an aggregate purchase price of up to \$360,000. The agreement contemplates three separate convertible debentures, with each maturing three years following the date of issuance. On March 28, 2017, the Company issued the first convertible debenture in the principal amount of \$100,000 for a purchase price of \$90,000. Pursuant to the Securities Purchase Agreement, the closing of the second convertible debenture was to occur upon mutual agreement of the parties, at any time within sixty (60) to ninety (90) days following the original signing closing date, in the principal amount of \$150,000 for a purchase price of \$135,000. On July 5, 2017, the Securities Purchase Agreement was amended to reduce the maximum aggregate principal amount of the convertible debentures to \$325,000, for an aggregate purchase price of up to \$292,500, and to reduce the principal amount of the second convertible debenture to \$75,000 for a purchase price of \$67,500. The closing of the second convertible debenture occurred on July 5, 2017. In connection with the closing of the second convertible debenture, the Company issued 75,000 shares of restricted common stock to the holder as a fee in consideration of the expenses incurred in consummating the transaction. The closing of the third convertible debenture was to occur upon mutual agreement of the parties within sixty (60) to ninety (90) days following the second closing, in the principal amount of \$150,000 for a purchase price of \$135,000. The convertible debentures are convertible into shares of the Company's common stock at a fixed conversion price of \$0.30 for the first one hundred eighty (180) days. After one hundred eighty (180) days, or in an event of default, the conversion price will be the lower of \$0.30 or sixty percent (60%) of the lowest closing bid price over the 20 trading days preceding the date of conversion. On September 22, 2017, the Company exercised its option to redeem the first closing of the March debenture, for a redemption price at \$130,000, 130% of the principal amount. The principal of \$100,000 was derecognized with the additional \$30,000 paid upon redemption recognized as a financing cost. On December 28, 2017, the Company exercised its option to redeem the second closing of the March debenture, for a redemption price at \$97,500, 130% of the principal amount. Upon redemption, the principal of \$75,000 was relieved, with the additional \$22,500 paid recognized as a financing cost.

On July 31, 2017, the Company entered into a 5% Securities Purchase Agreement with an accredited investor. The agreement calls for the purchase of up to \$135,000 in convertible debentures, due 12 months from issuance, with an original issue discount of \$13,500. The first convertible debenture was issued in the principal amount of \$45,000 for a purchase price of \$40,500 (an original issue discount of \$4,500), with additional closings to occur at the sole discretion of the holder. The convertible debentures are convertible into shares of the Company's common stock at a conversion price of sixty percent (60%) of the lowest trading price over the 25 trading days preceding the date of conversion, subject to adjustment. With each tranche under the July 31, 2017 convertible debentures, the Company shall issue a warrant to purchase an amount of shares of its common stock equal to the face value of each respective tranche divided by \$0.60 as a commitment fee. The Company issued a warrant to purchase 75,000 shares of the Company's common stock with the first closing, with an exercise price of \$0.60. The warrant has an anti-dilution provision for future issuances, whereby the exercise price would reset. The exercise price was adjusted to \$0.15, and the number of warrants issued to 300,000, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. On October 2, 2017, the Company entered into a second closing of the July 31, 2017 debenture, in the principal amount of \$22,500 for a purchase price of \$20,250, with \$1,500 deducted for legal fees, resulting in net cash proceeds of \$18,750. On February 5, 2018, the Company entered into an amendment to the July 31, 2017 debenture, whereby in exchange for a payment of \$6,500, the noteholder shall only be entitled to effectuate a conversion under the note on or after March 2, 2018. On February 20, 2018, the holder converted \$4,431 of the January debentures into 125,000 common shares of the Company. During March, 2018, the holder converted an additional \$17,113 of the July debentures into 630,000 common shares of the Company.

On August 28, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$110,000, with an original issue discount of \$10,000, which matures on February 28, 2018. The note is convertible into shares of the Company's common stock at a variable conversion rate equal to the lesser of sixty percent (60%) of the lowest trading price over the 20 trading days prior to the issuance of the note or sixty percent (60%) of the lowest trading price over the 20 trading days prior to conversion, subject to adjustment. In connection with the note, the Company issued 50,000 warrants, exercisable at \$0.20, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The exercise price was adjusted to \$0.15 and the warrants issued increased to 66,667, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. Additionally, in connection with the note, the Company also issued 343,750 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$58,438, based on the market value of the common shares at the closing date of \$0.17, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date. On October 31, 2017, there was a second closing to the August debenture, in the principal amount of \$66,000, maturing on April 30, 2018. The second closing has the same conversion terms as the first closing, however there were no additional warrants issued with the second closing. Additionally, in connection with the second closing, the Company issued 332,500 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$35,877, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date.

On September 11, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$146,000, with an original issue discount of \$13,500, which matures on June 11, 2018. The note is convertible into shares of the Company's common stock at a variable conversion rate equal to the lesser of the lowest trading price over the 25 trading days prior to the issuance of the note or fifty percent (50%) of the lowest trading price over the 25 trading days prior to conversion, subject to adjustment. In connection with the note, the Company issued 243,333 warrants, exercisable at \$0.15, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly.

On September 12, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$96,500 with an original issue discount of \$4,500, which matures on June 12, 2018. The note is able to be prepaid prior to the maturity date, at a cash redemption premium, at various stages as set forth in the agreement. The note is convertible commencing 180 days after issuance date (or upon an event of default), or March 11, 2018, at a variable conversion rate of sixty percent (60%) of the market price, defined as the lowest trading price during the 20 trading days prior to conversion, subject to adjustment. On March 20, 2018, the holder converted \$32,500 of the September 12, 2017 debentures into 1,031,746 common shares of the Company.

On September 28, 2017, the Company entered into a Securities Purchase Agreement with an accredited investor, pursuant to which the Company agreed to sell a 12% Convertible Note in the principal amount of \$55,000 with a maturity date of September 28, 2018, for a purchase price of \$51,700, and \$2,200 deducted for legal fees, resulting in net cash proceeds of \$49,500. The effective closing date of the Securities Purchase Agreement and Convertible Note was October 17, 2017. The note is convertible into shares of the Company's common stock at the holders' option, at any time, at a conversion price equal to the lower of (i) the closing sale price of the Company's common stock on the closing date, or (ii) sixty percent (60%) of either the lowest sale price for the Company's common stock during the 20 consecutive trading days including and immediately preceding the closing date, or the closing bid price, whichever is lower, provided that, if the price of the Company's common stock loses a bid, then the conversion price may be reduced, at the holder's absolute discretion, to a fixed conversion price of \$0.00001. If at any time the adjusted conversion price for any conversion would be less than par value of the Company's common stock, then the conversion price shall equal such par value for any such conversion and the conversion amount for such conversion shall be increased to include additional principal to the extent necessary to cause the number of shares issuable upon conversion equal the same number of shares as would have been issued had the Conversion Price not been subject to the minimum par value price.

On November 14, 2017, the Company entered into two 8% convertible redeemable notes with an accredited investor, in the aggregate principal amount of \$112,000, convertible into shares of common stock of the Company, with maturity dates of November 14, 2018. Each note was in the principal amount of \$56,000, with an original issue discount of \$2,800, resulting in a purchase price for each note of \$53,200. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$53,200 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on July 14, 2018. The notes are convertible into shares of the Company's common stock at a conversion rate of fifty-seven percent (57%) of the lowest of trading price over last 20 trading days prior to conversion, or the lowest closing bid price over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to forty-seven percent (47%) in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. During the first six months the convertible redeemable notes are in effect, the Company may redeem the notes at amounts ranging from 120% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each note.

On December 20, 2017, the Company entered into two 8% convertible redeemable notes with an accredited investor, in the aggregate principal amount of \$240,000, convertible into shares of common stock of the Company, with the same buyers as the November 14, 2017 debenture. Both notes are due on December 20, 2018. The first note was issued in the principal amount of \$160,000, with a \$4,000 original issue discount, resulting in a purchase price of \$156,000. The second note was issued in the principal amount of \$80,000, with an original issue discount of \$2,000, for a purchase price of \$78,000. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$78,000 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on August 20, 2018. The notes are convertible into shares of the Company's common stock at a conversion rate of sixty percent (60%) of the lower of: (i) lowest trading price or (ii) lowest closing bid price of the Company's common stock over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to fifty percent (50%) in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. During the first six months the convertible redeemable notes are in effect, the Company may redeem the notes at amounts ranging from 120% to 136% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each note.

On January 29, 2018, the Company entered into three (3) 12% convertible redeemable promissory notes with an accredited investor in the aggregate principal amount of \$120,000, with maturity dates of January 29, 2019. The notes are convertible into shares of the Company's common stock at a conversion rate of sixty percent (60%) of the lowest closing bid price over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to fifty percent (50%) in the event of a DTC chill. The interest rate upon an event of default, as defined in the notes, is 24% per annum. Each note was issued in the principal amount of \$40,000, with \$2,000 deducted for legal fees, for net proceeds of \$38,000. The first note was paid for by the buyer in cash upon closing, with the second and third notes initially paid by the issuance of offsetting \$40,000 secured promissory notes issued to the Company by the buyer (the "Buyer Notes"). The Buyer Notes are due on September 29, 2018. During the first 180 days the notes are in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the note. Upon any sale event, as defined in the note, at the holder's request, the Company will redeem the note for 150% of the principal and accrued interest.

On January 30, 2018, the Company entered into a 12% convertible redeemable promissory note with an accredited investor for the principal amount of \$80,000, which matures on January 30, 2019. The note is convertible into shares of the Company's common stock at a conversion rate of sixty-one percent (61%) of the lowest closing bid price over the last 15 trading days prior to conversion. The interest rate upon an event of default, as defined in the note, is 22% per annum, and the note becomes immediately due and payable in an amount equal to 150% of the principal and interest due on the note upon an event of default. If the Company fails to deliver conversion shares within two (2) days following a conversion request, the note will become immediately due and payable at an amount of twice the default amount. During the first 180 days the note is in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the note.

On March 20, 2018, the Company entered into a convertible note for the principal amount of \$84,000, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lower of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. In the event of a "DTC chill", the conversion rate is adjusted to 40% of the market price. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. Additionally, the Company also issued 255,675 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$28,124, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

On March 21, 2018, the Company entered into a convertible note for the principal amount of \$39,199, which includes an OID of \$4,199, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lowest of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. The discount is increased upon certain events set forth in the agreement regarding the obtainability of the shares, such as a DTC "chill". Additionally, if the Company ceases to be a reporting company, or after 181 days the note cannot be converted into freely traded shares, the discount is increased an additional 15%. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. Additionally, the Company also issued 119,300 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$13,123, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

The foregoing issuances were exempt from the registration requirements of the Securities Act pursuant to the exemption for transactions by an issuer not involved in any public offering under Section 4(a)(2) of the Securities Act and Rule 506 of Regulation D. The foregoing description of these issuances does not purport to be complete, and are qualified in their entirety by reference to the full text of the stock purchase agreements and convertible notes as past of the Companies exhibits incorporated herein by reference.

Sale and Issuance of Common Stock

On May 2, 2017, the Company sold 100,000 shares of its common stock to an accredited investor at \$0.25 per share, for total proceeds of \$25,000.

On October 10, 2017, the Company issued 200,000 shares of its common stock to consultants in consideration for consulting services provided to the Company.

On October 16, 2017, the Company issued 800,000 shares of its common stock to consultants in consideration for consulting services provided to the Company.

The foregoing issuances were exempt from the registration requirements of the Securities Act pursuant to the exemption for transactions by an issuer not involved in any public offering under Section 4(a)(2) of the Securities Act and Rule 506 of Regulation D.

Issuer Purchases of Equity Securities

During the fiscal year ended March 31, 2018, we did not repurchase any of our equity securities.

Cautionary Notice Regarding Forward Looking Statements

The information contained in Item 7 contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results may materially differ from those projected in the forward-looking statements as a result of certain risks and uncertainties set forth in this report. Although management believes that the assumptions made and expectations reflected in the forward-looking statements are reasonable, there is no assurance that the underlying assumptions will, in fact, prove to be correct or that actual results will not be different from expectations expressed in this report.

We desire to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. This filing contains a number of forward-looking statements that reflect management's current views and expectations with respect to our business, strategies, products, future results and events, and financial performance. All statements made in this filing other than statements of historical fact, including statements addressing operating performance, clinical developments which management expects or anticipates will or may occur in the future, including statements related to our technology, market expectations, future revenues, financing alternatives, statements expressing general optimism about future operating results, and non-historical information, are forward looking statements. In particular, the words "believe," "expect," "intend," "anticipate," "estimate," "may," variations of such words, and similar expressions identify forward-looking statements, but are not the exclusive means of identifying such statements, and their absence does not mean that the statement is not forward-looking. These forward-looking statements are subject to certain risks and uncertainties, including those discussed below. Our actual results, performance or achievements could differ materially from historical results as well as those expressed in, anticipated, or implied by these forward-looking statements. We do not undertake any obligation to revise these forward-looking statements to reflect any future events or circumstances.

Readers should not place undue reliance on these forward-looking statements, which are based on management's current expectations and projections about future events, are not guarantees of future performance, are subject to risks, uncertainties and assumptions (including those described below), and apply only as of the date of this filing. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. Factors which could cause or contribute to such differences include, but are not limited to, the risks to be discussed in this Annual Report on Form 10-K and in the press releases and other communications to shareholders issued by us from time to time which attempt to advise interested parties of the risks and factors which may affect our business. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. For additional information regarding forward-looking statements, see Item 1 – Our Business – "Forward-Looking Statements."

Use of Generally Accepted Accounting Principles (“GAAP”) Financial Measures

We use United States GAAP financial measures in the section of this report captioned “Management’s Discussion and Analysis or Plan of Operation” (MD&A), unless otherwise noted. All of the GAAP financial measures used by us in this report relate to the inclusion of financial information. This discussion and analysis should be read in conjunction with our financial statements and the notes thereto included elsewhere in this annual report. All references to dollar amounts in this section are in United States dollars, unless expressly stated otherwise. Please see Item 1A – “Risk Factors” for a list of our risk factors.

Overview

We were incorporated in the State of Nevada on July 3, 2008 under the name “Multiplayer Online Dragon, Inc.” Effective November 5, 2010, we effected an 8 for 1 forward stock split, increasing the issued and outstanding shares of our common stock from 12,000,000 shares to 96,000,000 shares. Effective October 29, 2014, we effected a 1 for 10 reverse stock split, decreasing the issued and outstanding shares of our common stock from 97,000,000 to 9,700,000.

On November 26, 2014, we entered into an Asset Purchase Agreement (the “Agreement”) with NaturalShrimp Holdings, Inc. a Delaware corporation (“NSH”), pursuant to which we agreed to acquire substantially all of the assets of NSH which assets consisted primarily of all of the issued and outstanding shares of capital stock of NaturalShrimp Corporation (“NSC”), a Delaware corporation, and NaturalShrimp Global, Inc. (“NS Global”), a Delaware corporation, and certain real property located outside of San Antonio, Texas (the “Assets”).

On January 30, 2015, we consummated the acquisition of the Assets pursuant to the Agreement. In accordance with the terms of the Agreement, we issued 75,520,240 shares of our common stock to NSH as consideration for the Assets. As a result of the transaction, NSH acquired 88.62% of our issued and outstanding shares of common stock, NSC and NS Global became our wholly-owned subsidiaries, and we changed our principal business to a global shrimp farming and biotechnology company.

In connection with our receipt of approval from the Financial Industry Regulatory Authority (“FINRA”), effective March 3, 2015, we amended our Articles of Incorporation to change our name to “NaturalShrimp Incorporated.”

We are a biotechnology company and have developed a proprietary technology that allows us to grow Pacific White shrimp (*Litopenaeus vannamei*, formerly *Penaeus vannamei*) in an ecologically controlled, high-density, low-cost environment, and in fully contained and independent production facilities. Our system uses technology which allows us to produce a naturally-grown shrimp “crop” weekly, and accomplishes this without the use of antibiotics or toxic chemicals. We have developed several proprietary technology assets, including a knowledge base that allows us to produce commercial quantities of shrimp in a closed system with a computer monitoring system that automates, monitors and maintains proper levels of oxygen, salinity and temperature for optimal shrimp production. Our initial production facility is located outside of San Antonio, Texas.

NS Global, one of our wholly-owned subsidiaries, owns approximately 1% of NaturalShrimp International A.S. in Europe. Our European-based partner, NaturalShrimp International A.S., Oslo, Norway, is responsible for the construction cost of its facility and initial operating capital.

The first facility built in Spain for NaturalShrimp International A.S. is GambaNatural de España, S.L. The land for the first facility was purchased in Medina del Campo, Spain, and construction of the 75,000 sq. ft. facility was completed in 2016. Medina del Campo is approximately seventy-five miles northwest of Madrid, Spain.

On October 16, 2015, we formed NAS. The purpose of the NAS is to formalize the business relationship between our Company and F&T Water Solutions LLC for the joint development of certain water technologies. The technologies shall include, without limitation, any and all inventions, patents, intellectual property and know-how dealing with enclosed aquatic production systems worldwide. This includes construction, operation, and management of enclosed aquatic production, other than shrimp, facilities throughout the world, co-developed by both parties at our facility located outside of La Coste, Texas.

The Company has three wholly-owned subsidiaries, including NSC, NS Global and NAS.

Evolution of Technology and Revenue Expectations

Historically, efforts to raise shrimp in a high-density, closed system at the commercial level have been met with either modest success or outright failure through “BioFloc Technology.” Infectious agents such as parasites, bacteria and viruses are the most damaging and most difficult to control. Bacterial infection can in some cases be combated through the use of antibiotics (although not always), and in general, the use of antibiotics is considered undesirable and counter to “green” cultivation practices. Viruses can be even worse, in that they are immune to antibiotics. Once introduced to a shrimp population, viruses can wipe out entire farms and shrimp populations, even with intense probiotic applications.

Our primary solution against infectious agents is our “Vibrio Suppression Technology.” We believe this system creates higher sustainable densities, consistent production, improved growth and survival rates and improved food conversion without the use of antibiotics, probiotics or unhealthy anti-microbial chemicals. Vibrio Suppression Technology helps to exclude and suppress harmful organisms that usually destroy “BioFloc” and other enclosed technologies.

In 2001, we began research and development of a high density, natural aquaculture system that is not dependent on ocean water to provide quality, fresh shrimp every week, fifty-two weeks a year. The initial NaturalShrimp system was successful, but the Company determined that it would not be economically feasible due to high operating costs. Over the next several years, using the knowledge we gained from developing the first system, we developed a shrimp production system that eliminated the high costs associated with the previous system. We have continued to refine this technology, eliminating bacteria and other problems that affect enclosed systems, and now have a successful shrimp growing process. We have produced thousands of pounds of shrimp over the last few years in order to develop a design that will consistently produce quality shrimp that grow to a large size at a specific rate of growth. This included experimenting with various types of natural live and synthesized feed supplies before selecting the most appropriate nutritious and reliable combination. It also included utilizing monitoring and control automation equipment to minimize labor costs and to provide the necessary oversight for proper regulation of the shrimp environment. However, there were further enhancements needed to our process and technology in order to begin production of shrimp on a commercially viable scale and to generate revenues.

Our current system consists of a reception tank where the shrimp are acclimated, then moved to a larger grow-out tank for the rest of the twenty-four week cycle. During 2016, we engaged in additional engineering projects with third parties to further enhance our indoor production capabilities. For example, through our relationship with Trane, Inc., a division of Ingersoll-Rand Plc (“Trane”), Trane has provided a detailed audit to use data to build and verify the capabilities of then initial Phase 1 prototype of a Trane-proposed three tank system at our La Coste, Texas facility. The company contracted F&T Water Solutions and RGA Labs to complete final engineering and building of the initial patent-pending modified Electrocoagulation system for the grow-out, harvesting and processing of fully mature, antibiotic-free Pacific White Leg shrimp. The design will present a viable pathway to begin generating revenue and producing shrimp on a commercially viable scale. The design is completed and was installed in early June by RGA Labs, and final financing for the system is expected to be provided by one of the Company’s existing institutional investors. The Company expects the first post larvae (PL) to arrive from the hatchery by the end of June and that it would take approximately six to nine months to begin producing and shipping shrimp.

Results of Operations

Comparison of the Fiscal Year Ended March 31, 2018 and the Fiscal Year Ended March 31, 2017

Revenue

We have not earned any significant revenues since our inception and we do not anticipate earning revenues in the near future.

Expenses

Our expenses for the year ended March 31, 2018 are summarized as follows, in comparison to our expenses for the year ended March 31, 2017:

	Years Ended March 31,	
	2018	2017
Salaries and related expenses	\$ 352,757	\$ 348,655
Rent	11,197	12,997
Professional fees	278,037	139,284
Other general and administrative expenses	443,508	408,246
Facility operations	27,789	70,930
Depreciation	70,894	60,459
Total	<u>\$ 1,184,182</u>	<u>\$ 1,040,571</u>

Operating expenses for the year ended March 31, 2018 were \$1,184,182, representing an increase of 14% compared to operating expenses of \$1,040,571 for the same period in 2017. The primary reason for the change is the increase in professional fees, including increases in accounting and consultant fees. This increase was offset by reduced facility fees.

Liquidity, Financial Condition and Capital Resources

As of March 31, 2018, we had cash on hand of \$24,280 and a working capital deficiency of approximately \$6,764,000, as compared to cash on hand of \$88,195 and a working capital deficiency of \$2,384,695 as of March 31, 2017. The increase in working capital deficiency for the year ended March 31, 2018 is mainly due to an increase in convertible debentures of approximately \$1,477,000 net of debt discounts of approximately \$692,000, an increase in the fair value of the derivative liability arising from the convertible debentures of \$2,538,000 and an increase in the warrant liability of \$249,000, and the decrease in cash, as well as an increase in accounts payable and accrued expenses.

Working Capital Deficiency

Our working capital deficiency as of March 31, 2018, in comparison to our working capital deficiency as of March 31, 2017, can be summarized as follows:

	March 31,	March 31,
	2018	2017
Current assets	\$ 260,179	\$ 312,195
Current liabilities	7,024,615	2,696,890
Working capital deficiency	<u>\$ 6,764,435</u>	<u>\$ 2,384,695</u>

The decrease in current assets is mainly due to the current period expense recognition of \$220,000 out of prepaid expenses for shares issued for services in connection with a six-month agreement with a consultant, as well as an approximate \$64,000 decrease in cash, offset by the addition of new notes receivable. The increase in current liabilities is primarily due to an increase in the carrying amount of the convertible debentures in the current period, net of the related debt discounts, as detailed above. The new convertible debentures entered into during the current year also contained embedded derivatives, which were bifurcated and further increased the fair value of the derivative liability, which was \$3,455,000 as of March 31, 2018 as compared to \$218,000 as of March 31, 2017. Additionally, the warrant liability increased by \$249,000 due to additional warrants issued as well as the reset provision which increased the number of warrants outstanding. Approximately \$485,000 of the convertible debentures outstanding at March 31, 2018, were converted subsequent to year end, and the related derivative liability reclassified to equity.

Cash Flows

Our cash flows for the year ended March 31, 2018, in comparison to our cash flows for the year ended March 31, 2017, can be summarized as follows:

	Year Ended March 31,	
	2018	2017
Net cash used in operating activities	\$ (765,793)	\$ (722,215)
Net cash used in investing activities	(171,050)	-
Net cash provided by financing activities	872,928	804,252
Increase (decrease) in cash and cash equivalents	\$ (63,915)	\$ 82,037

The increase in net cash used in operating activities in the year ended March 31, 2018, compared to the same period in 2017, mainly relates to a decrease in prepaid expenses and shares issued for services from fiscal 2017, offset by the non-cash charges of the amortization of the debt discount, changes in fair value of the derivative and warrant liabilities, financing costs in fiscal 2018. Additionally, there was an approximate \$2,339,000 gain on settlement of debt in the year ended March 31, 2017. The net cash used in investing activities in the year ended March 31, 2018 related to costs paid on construction in process on the new facility. The net cash provided by financing activities increased between periods, with the cash provided by financing activities during the year ended March 31, 2018 arising from proceeds on convertible debentures and the sale of common stock of the Company, offset by payments on outstanding convertible debentures. In comparison, the cash provided by financing activities during the year ended March 31, 2017 arose mainly from borrowings on notes payable with related parties.

Our cash position was approximately \$24,000 as of March 31, 2018. Management believes that our cash on hand and working capital are not sufficient to meet our current anticipated cash requirements through fiscal 2019, as described in further detail under the section titled “*Going Concern*” below.

Recent Financing Arrangements and Developments During the Period

Short-Term Debt and Lines of Credit

On November 3, 2015, the Company entered into a short-term note agreement with Community National Bank for a total value of \$50,000. The short-term note has a stated interest rate of 5.25%, maturity date of December 15, 2017 and had an initial interest only payment on February 3, 2016. The short-term note is guaranteed by an officer and director. The balance of the line of credit at both March 31, 2018 and 2017 was \$25,298.

The Company also has a working capital line of credit with Extraco Bank. On April 30, 2018, the Company renewed the line of credit for \$475,000. The line of credit bears an interest rate of 5.0% that is compounded monthly on unpaid balances and is payable monthly. The line of credit matures on April 30, 2019, and is secured by certificates of deposit and letters of credit owned by directors and shareholders of the Company. The balance of the line of credit is \$472,675 and \$473,029 at March 31, 2018 and March 31, 2017, respectively, included in non-current liabilities.

The Company also has additional lines of credit with Extraco Bank for \$100,000 and \$200,000, which were renewed on January 19, 2018 and April 30, 2018, respectively, with maturity dates of January 19, 2019 and April 30, 2019, respectively. The lines of credit bear an interest rate of 4.5% (increased to 6.5% and 5%, respectively, upon renewal in 2017) that is compounded monthly on unpaid balances and is payable monthly. They are secured by certificates of deposit and letters of credit owned by directors and shareholders of the Company. The balance of the lines of credit was \$278,470 at both March 31, 2018 and 2017.

The Company also has a working capital line of credit with Capital One Bank for \$50,000. The line of credit bears an interest rate of prime plus 25.9 basis points, which totaled 30.7% as of March 31, 2018. The line of credit is unsecured. The balance of the line of credit was \$9,580 at both March 31, 2018 and 2017.

The Company also has a working capital line of credit with Chase Bank for \$25,000. The line of credit bears an interest rate of prime plus 10 basis points, which totaled 14.75% as of March 31, 2018. The line of credit is secured by assets of the Company's subsidiaries. The balance of the line of credit is \$10,237 and \$11,197 at March 31, 2018 and March 31, 2017, respectively.

Bank Loan

On January 10, 2017, we entered into a promissory note agreement with Community National Bank in the principal amount of \$245,000, with an annual interest rate of 5% and a maturity date of January 10, 2020 (the "CNB Note"). The CNB Note is secured by certain real property owned by the Company in La Coste, Texas, and is also personally guaranteed by the Company's President and Chairman of the Board, as well as certain non-affiliated shareholders of the Company.

Convertible Debentures

On January 23, 2017, the Company entered into a Securities Purchase Agreement and issued a Convertible Note in the original principal amount of \$262,500 to an accredited investor, along with a Warrant to purchase 350,000 shares of the Company's common stock, in exchange for a purchase price of \$250,000. The Company received \$50,000 upon closing, with additional consideration to be paid to the Company in such amounts and at such dates as the holder may choose in its sole discretion. The warrants are exercisable over a period of five (5) years at an exercise price of \$0.60, subject to adjustment. The exercise price was adjusted to \$0.15, and the warrants issued increased to 280,000, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. The note is convertible into shares of the Company's common stock at a conversion price of \$0.35 per share, subject to adjustment. The maturity date of the note shall be two years from the date of each payment of consideration thereunder. A one-time interest charge of twelve percent (12%) shall be applied on the issuance date and payable on the maturity date. During the year ended March 31, 2018, the holder converted the \$50,000 of the January debentures to common shares of the Company.

On March 28, 2017, the Company entered into a Securities Purchase Agreement with an accredited investor related to the purchase and sale of certain convertible debentures in the aggregate principal amount of up to \$400,000 for an aggregate purchase price of up to \$360,000. The agreement contemplates three separate convertible debentures, with each maturing three years following the date of issuance. On March 28, 2017, the Company issued the first convertible debenture in the principal amount of \$100,000 for a purchase price of \$90,000. Pursuant to the Securities Purchase Agreement, the closing of the second convertible debenture was to occur upon mutual agreement of the parties, at any time within sixty (60) to ninety (90) days following the original signing closing date, in the principal amount of \$150,000 for a purchase price of \$135,000. On July 5, 2017, the Securities Purchase Agreement was amended to reduce the maximum aggregate principal amount of the convertible debentures to \$325,000, for an aggregate purchase price of up to \$292,500, and to reduce the principal amount of the second convertible debenture to \$75,000 for a purchase price of \$67,500. The closing of the second convertible debenture occurred on July 5, 2017. In connection with the closing of the second convertible debenture, the Company issued 75,000 shares of restricted common stock to the holder as a fee in consideration of the expenses incurred in consummating the transaction. The closing of the third convertible debenture was to occur upon mutual agreement of the parties within sixty (60) to ninety (90) days following the second closing, in the principal amount of \$150,000 for a purchase price of \$135,000. The third closing has not occurred. The convertible debentures are convertible into shares of the Company's common stock at a fixed conversion price of \$0.30 for the first one hundred eighty (180) days. After one hundred eighty (180) days, or in an event of default, the conversion price will be the lower of \$0.30 or sixty percent (60%) of the lowest closing bid price over the 20 trading days preceding the date of conversion. On September 22, 2017, the Company exercised its option to redeem the first closing of the March debenture, for a redemption price at \$130,000, 130% of the principal amount. The principal of \$100,000 was derecognized with the additional \$30,000 paid upon redemption recognized as a financing cost. On December 28, 2017, the Company exercised its option to redeem the second closing of the March debenture, for a redemption price at \$97,500, 130% of the principal amount. Upon redemption, the principal of \$75,000 was relieved, with the additional \$22,500 paid recognized as a financing cost.

On July 31, 2017, the Company entered into a 5% Securities Purchase Agreement with an accredited investor. The agreement calls for the purchase of up to \$135,000 in convertible debentures, due 12 months from issuance, with an original issue discount of \$13,500. The first convertible debenture was issued in the principal amount of \$45,000 for a purchase price of \$40,500 (an original issue discount of \$4,500), with additional closings to occur at the sole discretion of the holder. The convertible debentures are convertible into shares of the Company's common stock at a conversion price of sixty percent (60%) of the lowest trading price over the 25 trading days preceding the date of conversion, subject to adjustment. With each tranche under the July 31, 2017 convertible debentures, the Company shall issue a warrant to purchase an amount of shares of its common stock equal to the face value of each respective tranche divided by \$0.60 as a commitment fee. The Company issued a warrant to purchase 75,000 shares of the Company's common stock with the first closing, with an exercise price of \$0.60. The warrant has an anti-dilution provision for future issuances, whereby the exercise price would reset. The exercise price was adjusted to \$0.15, and the number of warrants issued to 300,000, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. On October 2, 2017, the Company entered into a second closing of the July 31, 2017 debenture, in the principal amount of \$22,500 for a purchase price of \$20,250, with \$1,500 deducted for legal fees, resulting in net cash proceeds of \$18,750. On February 5, 2018, the Company entered into an amendment to the July 31, 2017 debenture, whereby in exchange for a payment of \$6,500, except for a conversion of up to 125,000 shares of the Company's common shares, the noteholder shall only be entitled to effectuate a conversion under the note on or after March 2, 2018. On February 20, 2018, the holder converted \$4,431 of the January debentures into 125,000 common shares of the Company. During March, 2018, the holder converted an additional \$17,113 of the July debentures into 630,000 common shares of the Company.

On August 28, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$110,000, with an original issue discount of \$10,000, which matures on February 28, 2018. The note is convertible into shares of the Company's common stock at a variable conversion rate equal to the lesser of sixty percent (60%) of the lowest trading price over the 20 trading days prior to the issuance of the note or sixty percent (60%) of the lowest trading price over the 20 trading days prior to conversion, subject to adjustment. In connection with the note, the Company issued 50,000 warrants, exercisable at \$0.20, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The exercise price was adjusted to \$0.15 and the warrants issued increased to 66,667, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. Additionally, in connection with the note, the Company also issued 343,750 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$58,438, based on the market value of the common shares at the closing date of \$0.17, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date. On October 31, 2017, there was a second closing to the August debenture, in the principal amount of \$66,000, maturing on April 30, 2018. The second closing has the same conversion terms as the first closing, however there were no additional warrants issued with the second closing. Additionally, in connection with the second closing, the Company issued 332,500 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$35,877, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date. Subsequent to year end the note holders issued a waiver as to the maturity date of the two notes and a technical default provision. The notes have subsequently been fully converted.

On September 11, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$146,000, with an original issue discount of \$13,500, which matures on June 11, 2018. The note is convertible into shares of the Company's common stock at a variable conversion rate equal to the lesser of the lowest trading price over the 25 trading days prior to the issuance of the note or fifty percent (50%) of the lowest trading price over the 25 trading days prior to conversion, subject to adjustment. In connection with the note, the Company issued 243,333 warrants, exercisable at \$0.15, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly.

On September 12, 2017, the Company entered into a 12% convertible promissory note with an accredited investor in the principal amount of \$96,500 with an original issue discount of \$4,500, which matures on June 12, 2018. The note is able to be prepaid prior to the maturity date, at a cash redemption premium, at various stages as set forth in the agreement. The note is convertible commencing 180 days after issuance date (or upon an event of default), or March 11, 2018, at a variable conversion rate of sixty percent (60%) of the market price, defined as the lowest trading price during the 20 trading days prior to conversion, subject to adjustment. On March 20, 2018, the holder converted \$32,500 of the September 12, 2017 debentures into 1,031,746 common shares of the Company. Subsequent to year end, the remainder of the outstanding note has been fully converted.

On September 28, 2017, the Company entered into a Securities Purchase Agreement with an accredited investor, pursuant to which the Company agreed to sell a 12% Convertible Note in the principal amount of \$55,000 with a maturity date of September 28, 2018, for a purchase price of \$51,700, and \$2,200 deducted for legal fees, resulting in net cash proceeds of \$49,500. The effective closing date of the Securities Purchase Agreement and Convertible Note was October 17, 2017. The note is convertible into shares of the Company's common stock at the holders' option, at any time, at a conversion price equal to the lower of (i) the closing sale price of the Company's common stock on the closing date, or (ii) sixty percent (60%) of either the lowest sale price for the Company's common stock during the 20 consecutive trading days including and immediately preceding the closing date, or the closing bid price, whichever is lower, provided that, if the price of the Company's common stock loses a bid, then the conversion price may be reduced, at the holder's absolute discretion, to a fixed conversion price of \$0.00001. If at any time the adjusted conversion price for any conversion would be less than par value of the Company's common stock, then the conversion price shall equal such par value for any such conversion and the conversion amount for such conversion shall be increased to include additional principal to the extent necessary to cause the number of shares issuable upon conversion equal the same number of shares as would have been issued had the Conversion Price not been subject to the minimum par value price.

On November 14, 2017, the Company entered into two 8% convertible redeemable notes with an accredited investor, in the aggregate principal amount of \$112,000, convertible into shares of common stock of the Company, with maturity dates of November 14, 2018. Each note was in the principal amount of \$56,000, with an original issue discount of \$2,800, resulting in a purchase price for each note of \$53,200. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$53,200 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on July 14, 2018. The notes are convertible into shares of the Company's common stock at a conversion rate of fifty-seven percent (57%) of the lowest of trading price over last 20 trading days prior to conversion, or the lowest closing bid price over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to forty-seven percent (47%) in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. During the first six months the convertible redeemable notes are in effect, the Company may redeem the notes at amounts ranging from 120% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each note.

On December 20, 2017, the Company entered into two 8% convertible redeemable notes with an accredited investor, in the aggregate principal amount of \$240,000, convertible into shares of common stock of the Company, with the same buyers as the November 14, 2017 debenture. Both notes are due on December 20, 2018. The first note was issued in the principal amount of \$160,000, with a \$4,000 original issue discount, resulting in a purchase price of \$156,000. The second note was issued in the principal amount of \$80,000, with an original issue discount of \$2,000, for a purchase price of \$78,000. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$78,000 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on August 20, 2018. The notes are convertible into shares of the Company's common stock at a conversion rate of sixty percent (60%) of the lower of: (i) lowest trading price or (ii) lowest closing bid price of the Company's common stock over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to fifty percent (50%) in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. During the first six months the convertible redeemable notes are in effect, the Company may redeem the notes at amounts ranging from 120% to 136% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each note.

On January 29, 2018, the Company entered into three (3) 12% convertible redeemable promissory notes with an accredited investor in the aggregate principal amount of \$120,000, with maturity dates of January 29, 2019. The notes are convertible into shares of the Company's common stock at a conversion rate of sixty percent (60%) of the lowest closing bid price over the last 20 trading days prior to conversion, with the discount increased (i.e., the conversion rate decreased) to fifty percent (50%) in the event of a DTC chill. The interest rate upon an event of default, as defined in the notes, is 24% per annum. Each note was issued in the principal amount of \$40,000, with \$2,000 deducted for legal fees, for net proceeds of \$38,000. The first note was paid for by the buyer in cash upon closing, with the second and third notes initially paid by the issuance of offsetting \$40,000 secured promissory notes issued to the Company by the buyer (the "Buyer Notes"). The Buyer Notes are due on September 29, 2018. During the first 180 days the notes are in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the note. Upon any sale event, as defined in the note, at the holder's request, the Company will redeem the note for 150% of the principal and accrued interest.

On January 30, 2018, Company entered into a 12% convertible redeemable promissory note with an accredited investor for the principal amount of \$80,000, which matures on January 30, 2019. The note is convertible into shares of the Company's common stock at a conversion rate of sixty-one percent (61%) of the lowest closing bid price over the last 15 trading days prior to conversion. The interest rate upon an event of default, as defined in the note, is 22% per annum, and the note becomes immediately due and payable in an amount equal to 150% of the principal and interest due on the note upon an event of default. If the Company fails to deliver conversion shares within two (2) days following a conversion request, the note will become immediately due and payable at an amount of twice the default amount. During the first 180 days the note is in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the note.

On March 9, 2018, the Company entered into a 12% convertible note for the principal amount of \$43,000, with the holder of the January 30, 2018 debenture, convertible into shares of common stock of the Company, which matures on March 9, 2019. Upon an event of default, as defined in the note, the note becomes immediately due and payable, in an amount equal to 150% of all principal and accrued interest due on the note, with default interest of 22% per annum (the "Default Amount"). If the Company fails to deliver conversion shares within 2 days of a conversion request, the note becomes immediately due and payable at an amount of twice the Default Amount. The note is convertible on the date beginning 180 days after issuance of the note, at 61% of the lowest closing bid price for the last 15 days. Per the agreement, the Company is required at all times to have authorized and reserved six times the number of shares that is actually issuable upon full conversion of the note. Failure to maintain the reserved number of shares is considered an event of default.

On March 20, 2018, the Company entered into a convertible note for the principal amount of \$84,000, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lower of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. In the event of a "DTC chill", the conversion rate is adjusted to 40% of the market price. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. Additionally, the Company also issued 255,675 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$28,124, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

On March 21, 2018, the Company entered into a convertible note for the principal amount of \$39,199, which includes an OID of \$4,199, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lowest of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. The discount is increased upon certain events set forth in the agreement regarding the obtainability of the shares, such as a DTC "chill". Additionally, if the Company ceases to be a reporting company, or after 181 days the note cannot be converted into freely traded shares, the discount is increased an additional 15%. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. Additionally, the Company also issued 119,300 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$13,123, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

Sale and Issuance of Common Stock

On May 2, 2017, the Company sold 100,000 shares of its common stock to an accredited investor at \$0.25 per share, for total proceeds of \$25,000.

On October 10, 2017, the Company issued 200,000 shares of its common stock to consultants in consideration for consulting services provided to the Company.

Shareholder Notes Payable

Since inception, the Company has entered into several working capital notes payable to Bill Williams, an executive officer, director, and shareholder of the Company, for a total of \$486,500. These notes are demand notes, had stock issued in lieu of interest and have no set monthly payment or maturity date. The balance of these notes at March 31, 2018 and 2017 was \$426,404 and \$426,404, respectively, and is classified as a current liability on the consolidated balance sheets. At March 31, 2018 and 2017, accrued interest payable was \$206,920 and \$172,808, respectively. We repaid \$0 during the years ended March 31, 2018 and 2017.

In 2009, the Company made and entered into an unsecured note payable to Randall Steele, a shareholder of NSH, in the principal amount of \$50,000. The note accrues interest at six percent (6%) and matured on January 20, 2011. As of December 31, 2017, and March 31, 2017, the balance of the note was \$50,000, and is classified as a current liability on our consolidated balance sheets.

On January 1, 2016, the Company entered into a note payable agreement with NSH, the Company's majority shareholder. Between January 16, 2016 and March 31, 2017, the Company borrowed \$736,111 under this agreement. The note payable has no set monthly payment or maturity date, and has a stated interest rate of two percent (2%). There was no borrowing under this loan during the year ended March 31, 2018.

Between January 1, 2017 and March 31, 2017, the Company entered into two Private Placement Subscription Agreements and issued two Six Percent (6%) Unsecured Convertible Notes to Dragon Acquisitions LLC, an affiliate of the Company ("Dragon Acquisitions"). William Delgado, our Treasurer, Chief Financial Officer, and director, is the managing member of Dragon Acquisitions. The first note was issued on January 20, 2017, in the principal amount of \$20,000, and the second note was issued on March 14, 2017, in the principal amount of \$20,000. The notes accrue interest at the rate of six percent (6%) per annum, and mature one (1) year from the date of issuance. Upon an event of default, the default interest rate will be increased to twenty-four percent (24%), and the total amount of principal and accrued interest shall become immediately due and payable at the holder's discretion. The notes are convertible into shares of the Company's common stock at a conversion price of \$0.30 per share, subject to adjustment. The notes were repaid in full between March and May 2017.

On April 20, 2017, the Company issued an additional Six Percent (6%) Unsecured Convertible Note to Dragon Acquisitions in the principal amount of \$140,000. The note accrues interest at the rate of six percent (6%) per annum, and matures one (1) year from the date of issuance. Upon an event of default, the default interest rate will be increased to twenty-four percent (24%), and the total amount of principal and accrued interest shall become immediately due and payable at the holder's discretion. The note is convertible into shares of the Company's common stock at a conversion price of \$0.30 per share, subject to adjustment. \$52,400 of the note has been repaid during the year ended March 31, 2018.

Going Concern

The audited consolidated financial statements contained in this annual report on Form 10-K have been prepared, assuming that the Company will continue as a going concern. The Company has accumulated losses through the period to March 31, 2018 of approximately \$34,013,000 as well as negative cash flows from operating activities of approximately \$767,000. Presently, the Company does not have sufficient cash resources to meet its plans in the twelve months following March 31, 2018. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management is in the process of evaluating various financing alternatives in order to finance the continued build-out of our equipment and for general and administrative expenses. These alternatives include raising funds through public or private equity markets and either through institutional or retail investors. Although there is no assurance that the Company will be successful with our fund raising initiatives, management believes that the Company will be able to secure the necessary financing as a result of ongoing financing discussions with third party investors and existing shareholders.

The consolidated financial statements do not include any adjustments that may be necessary should the Company be unable to continue as a going concern. The Company's continuation as a going concern is dependent on its ability to obtain additional financing as may be required and ultimately to attain profitability. If the Company raises additional funds through the issuance of equity, the percentage ownership of current shareholders could be reduced, and such securities might have rights, preferences or privileges senior to the rights, preferences and privileges of the Company's common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, the Company may not be able to take advantage of prospective business endeavors or opportunities, which could significantly and materially restrict its future plans for developing its business and achieving commercial revenues. If the Company is unable to obtain the necessary capital, the Company may have to cease operations.

Future Financing

We will require additional funds to implement our growth strategy for our business. In addition, while we have received capital from various private placements that have enabled us to fund our operations, these funds have been largely used to develop our processes, although additional funds are needed for other corporate operational and working capital purposes. Subsequent to year end we have raised approximately an additional \$224,000, net of OID, from convertible debentures. However, not including funds needed for capital expenditures or to pay down existing debt and trade payables, we anticipate that we will need to raise an additional \$950,000 to cover all of our operational expenses over the next 12 months, not including any capital expenditures needed as part of any commercial scale-up of our equipment. These funds may be raised through equity financing, debt financing, or other sources, which may result in further dilution in the equity ownership of our shares. There can be no assurance that additional financing will be available to us when needed or, if available, that such financing can be obtained on commercially reasonable terms. If we are not able to obtain the additional necessary financing on a timely basis, or if we are unable to generate significant revenues from operations, we will not be able to meet our other obligations as they become due, and we will be forced to scale down or perhaps even cease our operations.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to stockholders.

Effects of Inflation

We do not believe that inflation has had a material impact on our business, revenues or operating results during the periods presented.

Critical Accounting Policies and Estimates

Our significant accounting policies are more fully described in the notes to our financial statements included in this Annual Report on Form 10-K for the fiscal year ended March 31, 2018. We believe that the accounting policies below are critical for one to fully understand and evaluate our financial condition and results of operations.

Fair Value Measurement

The fair value measurement guidance clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in the valuation of an asset or liability. It establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the fair value measurement guidance are described below:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities;

Level 2 - Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; or

Level 3 - Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company did not have any Level 1 or Level 2 assets and liabilities at March 31, 2018 and 2017.

The Derivative liabilities are Level 3 fair value measurements.

Basic and Diluted Earnings/Loss per Common Share

Basic and diluted earnings or loss per share ("EPS") amounts in the consolidated financial statements are computed in accordance with ASC 260 – 10 *Earnings per Share*, which establishes the requirements for presenting EPS. Basic EPS is based on the weighted average number of common shares outstanding. Diluted EPS is based on the weighted average number of common shares outstanding and dilutive common stock equivalents. Basic EPS is computed by dividing net income or loss available to common stockholders (numerator) by the weighted average number of common shares outstanding (denominator) during the period. For the year ended March 31, 2018, the Company had \$1,292,000 in convertible debentures whose underlying shares are convertible at the holders' option at conversion prices ranging from 50 - 60% of the defined trading price and approximately 4,625,000 warrants with an exercise price of 50% to 57% of the market price of the Company's common stock, which were not included in the calculation of diluted EPS as their effect would be anti-dilutive. Included in the diluted EPS for the year ended March 31, 2017, the Company had \$150,000 in convertible debentures whose underlying shares are convertible at the holders' option at initial fixed conversion prices ranging from \$0.30 to \$0.35.

Income Taxes

Deferred income tax assets and liabilities are computed for differences between the financial statement and tax basis of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

In addition, the Company's management performs an evaluation of all uncertain income tax positions taken or expected to be taken in the course of preparing the Company's income tax returns to determine whether the income tax positions meet a "more likely than not" standard of being sustained under examination by the applicable taxing authorities. This evaluation is required to be performed for all open tax years, as defined by the various statutes of limitations, for federal and state purposes.

On December 22, 2017, the President of the United States signed and enacted into law H.R. 1 (the "Tax Reform Law"). The Tax Reform Law, effective for tax years beginning on or after January 1, 2018, except for certain provisions, resulted in significant changes to existing United States tax law, including various provisions that are expected to impact the Company. The Tax Reform Law reduces the federal corporate tax rate from 35% to 21% effective January 1, 2018. The Company will continue to analyze the provisions of the Tax Reform Law to assess the impact on the Company's consolidated financial statements.

Impairment of LongLived Assets and LongLived Assets

The Company will periodically evaluate the carrying value of longlived assets to be held and used when events and circumstances warrant such a review and at least annually. The carrying value of a longlived asset is considered impaired when the anticipated undiscounted cash flow from such asset is separately identifiable and is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the longlived asset. Fair value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on longlived assets to be disposed of are determined in a similar manner, except that fair values are reduced for the cost to dispose.

Recent Accounting Standards

During the year ended March 31, 2018 and through the date of this report, there were several new accounting pronouncements issued by the Financial Accounting Standards Board ("FASB"). Each of these pronouncements, as applicable, has been or will be adopted by the Company. Management does not believe the adoption of any of these accounting pronouncements has had or will have a material impact on the Company's consolidated financial statements.

Recently Issued Accounting Standards

In May 2014, FASB issued Accounting Standards Update ("ASU") No. 2014-09, "Revenue from Contracts with Customers," which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for annual reporting periods for public business entities beginning after December 15, 2017, including interim periods within that reporting period. The new standard permits the use of either the retrospective or cumulative effect transition method. The Company is currently evaluating the effect that ASU 2014-09 will have on its financial statements and related disclosures. As there have been no significant revenues to date, the Company does not expect the adoption to have a material impact and no transition method will be necessary upon adoption.

In February 2016, FASB issued ASU No. 2016-02, *Leases* (Topic 842). The standard requires all leases that have a term of over 12 months to be recognized on the balance sheet with the liability for lease payments and the corresponding right-of-use asset initially measured at the present value of amounts expected to be paid over the term. Recognition of the costs of these leases on the income statement will be dependent upon their classification as either an operating or a financing lease. Costs of an operating lease will continue to be recognized as a single operating expense on a straight-line basis over the lease term. Costs for a financing lease will be disaggregated and recognized as both an operating expense (for the amortization of the right-of-use asset) and interest expense (for interest on the lease liability). This standard will be effective for our interim and annual periods beginning January 1, 2019, and must be applied on a modified retrospective basis to leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. We are currently evaluating the timing of adoption and the potential impact of this standard on our financial position, but we do not expect it to have a material impact on our results of operations.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not Applicable.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information called for by Item 8 is included following the "Index to Financial Statements" on page F-1 contained in this annual report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer (who is our Principal Executive Officer) and our Chief Financial Officer and Treasurer (who is our Principal Financial Officer and Principal Accounting Officer), of the effectiveness of the design of our disclosure controls and procedures (as defined by Exchange Act Rules 13a-15(e) or 15d-15(e)) as of March 31, 2018 pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were not effective as of March 31, 2018 in ensuring that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. This conclusion is based on findings that constituted material weaknesses. A material weakness is a deficiency, or a combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's interim financial statements will not be prevented or detected on a timely basis.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of our management, which currently consists of our Chief Executive Officer and Treasurer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on criteria established in the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO" - 2013) and SEC guidance on conducting such assessments. Our management concluded, as of March 31, 2018, that our internal control over financial reporting was not effective. Management realized there were deficiencies in the design or operation of the Company's internal control that adversely affected the Company's internal controls which management considers to be material weaknesses.

In performing the above-referenced assessment, management had concluded that as of March 31, 2018, there were deficiencies in the design or operation of our internal control that adversely affected our internal controls, which management considers to be material weaknesses, including those described below:

(i) *Lack of Formal Policies and Procedures.* We utilize a third party independent contractor for the preparation of our financial statements. Although the financial statements and footnotes are reviewed by our management, we do not have a formal policy to review significant accounting transactions and the accounting treatment of such transactions. The third party independent contractor is not involved in the day to day operations of the Company and may not be provided information from management on a timely basis to allow for adequate reporting/consideration of certain transactions.

(ii) *Audit Committee and Financial Expert.* We do not have a formal audit committee with a financial expert, and thus we lack the board oversight role within the financial reporting process.

(iii) *Insufficient Resources.* We have insufficient quantity of dedicated resources and experienced personnel involved in reviewing and designing internal controls. As a result, a material misstatement of the interim and annual financial statements could occur and not be prevented or detected on a timely basis.

(iv) *Entity Level Risk Assessment.* We did not perform an entity level risk assessment to evaluate the implication of relevant risks on financial reporting, including the impact of potential fraud related risks and the risks related to non-routine transactions, if any, on internal control over financial reporting. Lack of an entity-level risk assessment constituted an internal control design deficiency which resulted in more than a remote likelihood that a material error would not have been prevented or detected, and constituted a material weakness.

(v) *Lack of Personnel with GAAP Experience.* We lack personnel with formal training to properly analyze and record complex transactions in accordance with U.S. GAAP.

Our management feels the weaknesses identified above have not had any material affect on our financial results. However, we are currently reviewing our disclosure controls and procedures related to these material weaknesses and expect to implement changes in the near term as resources permit, including identifying specific areas within our governance, accounting and financial reporting processes to add adequate resources to potentially mitigate these material weaknesses.

Our management will continue to monitor and evaluate the effectiveness of our internal controls and procedures and our internal controls over financial reporting on an ongoing basis and is committed to taking further action and implementing additional enhancements or improvements, as necessary and as funds allow.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the year ended March 31, 2018 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting. We believe that a control system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the control system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within any company have been detected.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Set forth below are the present directors and executive officers of the Company. Except as set forth below, there are no other persons who have been nominated or chosen to become directors, nor are there any other persons who have been chosen to become executive officers. Other than as set forth below, there are no arrangements or understandings between any of the directors, officers and other persons pursuant to which such person was selected as a director or an officer.

Name	Age	Position	Since
Bill G. Williams	83	Chairman of the Board, Chief Executive Officer	2015
Gerald Easterling	70	President, Secretary, Director	2015
William Delgado	59	Treasurer, Chief Financial Officer, Director	2014

The Board of Directors is comprised of only one class. All of the directors serve for a term of one year and until their successors are elected at the Company's annual shareholders meeting and are qualified, subject to removal by the Company's shareholders. Each executive officer serves, at the pleasure of the Board of Directors, for a term of one year and until his successor is elected at a meeting of the Board of Directors and is qualified.

Our Board of Directors believes that all members of the Board and all executive officers encompass a range of talent, skill, and experience sufficient to provide sound and prudent guidance with respect to our operations and interests. The information below with respect to our directors and executive officers includes each individual's experience, qualifications, attributes, and skills that led our Board of Directors to the conclusion that he or she should serve as a director and/or executive officer.

Biographies

Set forth below are brief accounts of the business experience during the past five years of each director, executive officer and significant employee of the Company.

Bill G. Williams – Co-Founder, Chairman of the Board and Chief Executive Officer

Mr. Williams has served as Chairman of the Board and CEO of NSH since its inception in 2001. From 1997 to 2003, he was Chairman and CEO of Direct Wireless Communications, Inc. and its successor Health Discovery Corporation, a public company listed on the OTCBB exchange. From 1990 to 1997, Mr. Williams was Chairman and CEO of Cafe Quick Enterprises, which uses a unique, patented air impingement technology to cook fresh and frozen food in vending machines. From 1985 to 1990, Mr. Williams was Chairman and CEO of Ameritron Corporation, a multi-business holding company. Mr. Williams has also served a member of the board of directors of NaturalShrimp Corporation and NaturalShrimp Global, Inc. since 2001.

We believe Mr. Williams is qualified to serve on our board of directors because of his business experiences, including his experience as a director of companies in similar industries, as described above.

Gerald Easterling – Co-Founder, President and Director

Mr. Easterling has served as President and a director of NSH since its inception in 2001. Mr. Easterling has experience in the food business and related industries. In the five years prior to the formation of NSH, Mr. Easterling was Chairman of the Board of Excel Vending Companies. He also was President and Director of Cafe Quick Enterprises and has been a member of the board since 1988. Mr. Easterling has also served a member of the board of directors of NaturalShrimp Corporation and NaturalShrimp Global, Inc. since 2001.

We believe Mr. Easterling is qualified to serve on our board of directors because of his business experiences, including his experience as a director of companies in similar industries, as described above.

Thomas Untermeyer – Co-Founder and Chief Technology Consultant

Mr. Untermeyer is a co-founder of NSH, has served as an engineering consultant to NSH since 2001, and is the Company's Chief Technology Officer. Mr. Untermeyer holds a Bachelor of Science in electrical engineering from St. Mary's University. Mr. Untermeyer also serves as Senior Program Manager with Southwest Research Institute, San Antonio. Mr. Untermeyer is the inventor of the initial technology behind the computer-controlled shrimp-raising system used by the Company.

William J. Delgado – Treasurer, Chief Financial Officer (former President of Multiplayer Online Dragon, Inc.) and Director

Mr. Delgado has served as Director of the Company since May 19, 2014. Since August 2004, Mr. Delgado has served as a Director, President, Chief Executive Officer and Chief Financial Officer of Global Digital Solutions, Inc. ("GDSI"), a publicly traded company that provides cyber arms manufacturing, complementary security and technology solutions and knowledge-based, cyber-related, culturally attuned social consulting in unsettled areas. Effective August 12, 2013, Mr. Delgado assumed the position of Executive Vice President of GDSI. He began his career with Pacific Telephone in the Outside Plant Construction. He moved to the network engineering group and concluded his career at Pacific Bell as the Chief Budget Analyst for the Northern California region. Mr. Delgado founded All Star Telecom in late 1991, specializing in OSP construction and engineering and systems cabling. All Star Telecom was sold to International FiberCom in April 1999. After leaving International FiberCom in 2002, Mr. Delgado became President/CEO of Pacific Comtel in San Diego, California, which was acquired by GDSI in 2004. Mr. Delgado holds a BS with honors in Applied Economics from the University of San Francisco and Graduate studies in Telecommunications Management at Southern Methodist University.

We believe Mr. Delgado is qualified to serve on our board of directors because of his business experiences, including his experience in management and as a director of public companies, as described above.

Family Relationships

There are no other family relationships between or among any of our directors, executive officers and any incoming directors or executive officers.

Involvement in Certain Legal Proceedings

No director, executive officer, significant employee or control person of the Company has been involved in any legal proceeding listed in Item 401(f) of Regulation S-K in the past 10 years.

Committees of the Board

Our Board of Directors held one formal meeting in the fiscal year-ended March 31, 2018. Otherwise, all proceedings of the Board of Directors were conducted by resolutions consented to in writing by the directors and filed with the minutes of the proceedings of the directors. Such resolutions consented to in writing by the directors entitled to vote on that resolution at a meeting of the directors are, according to the Nevada Revised Statutes and the bylaws of our Company, as valid and effective as if they had been passed at a meeting of the directors duly called and held. We do not presently have a policy regarding director attendance at meetings.

We do not currently have a standing audit, nominating or compensation committee of the Board of Directors, or any committee performing similar functions. Our Board of Directors performs the functions of audit, nominating and compensation committees.

Audit Committee

Our Board of Directors has not established a separate audit committee within the meaning of Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Instead, the entire Board of Directors acts as the audit committee within the meaning of Section 3(a)(58)(B) of the Exchange Act and will continue to do so until such time as a separate audit committee has been established.

Audit Committee Financial Expert

We currently have not designated anyone as an “audit committee financial expert,” as defined in Item 407(d)(5) of Regulation S-K as we have not yet created an audit committee of the Board of Directors.

Compliance with Section 16(a) of the Securities Exchange Act of 1934

Section 16(a) of the Securities Exchange Act requires our executive officers and directors, and persons who own more than 10% of our common stock, to file reports regarding ownership of, and transactions in, our securities with the Securities and Exchange Commission and to provide us with copies of those filings.

Based solely on our review of the copies of such forms received by us, or written representations from certain reporting persons, we believe that during the fiscal year ended March 31, 2018, one of our officers, directors and greater than 10% percent beneficial owners failed to comply on a timely basis with all applicable filing requirements under Section 16(a) of the Exchange Act.

On January 20, 2017, the Company issued a convertible note in the principal amount of \$20,000 to Dragon Acquisitions, an affiliate of the Company whose managing member is William Delgado, the Chief Financial Officer of the Company. On March 14, 2017, the Company issued a convertible note in the principal amount of \$20,000 to Dragon Acquisitions. On April 20, 2017, the Company issued a convertible note in the principal amount of \$140,000 to Dragon Acquisitions. These notes are convertible into shares of the Company’s common stock at a conversion price of \$0.30 per share. William Delgado, a director and executive officer of the Company and managing member of Dragon Acquisitions, should have filed a Form 4 in connection with the issuance of each of the foregoing convertible notes.

Nominations to the Board of Directors

Our directors play a critical role in guiding our strategic direction and oversee the management of the Company. Board candidates are considered based upon various criteria, such as their broad-based business and professional skills and experiences, a global business and social perspective, concern for the long-term interests of the stockholders, diversity, and personal integrity and judgment.

In addition, directors must have time available to devote to Board activities and to enhance their knowledge in the growing business. Accordingly, we seek to attract and retain highly qualified directors who have sufficient time to attend to their substantial duties and responsibilities to the Company.

In carrying out its responsibilities, the Board will consider candidates suggested by stockholders. If a stockholder wishes to formally place a candidate’s name in nomination, however, he or she must do so in accordance with the provisions of the Company’s Bylaws. Suggestions for candidates to be evaluated by the proposed directors must be sent to the Board of Directors, c/o NaturalShrimp Incorporated, 15150 Preston Rd, Suite 300, Dallas, TX 75248.

Director Nominations

As of March 31, 2018, we did not effect any material changes to the procedures by which our shareholders may recommend nominees to our Board of Directors.

Board Leadership Structure and Role on Risk Oversight

Bill G. Williams currently serves as the Company’s principal executive officer and Chairman of the Company’s Board of Directors. The Company determined this leadership structure was appropriate for the Company due to our small size and limited operations and resources. The Board of Directors will continue to evaluate the Company’s leadership structure and modify as appropriate based on the size, resources and operations of the Company. It is anticipated that the Board of Directors will establish procedures to determine an appropriate role for the Board of Directors in the Company’s risk oversight function.

Compensation Committee Interlocks and Insider Participation

No interlocking relationship exists between our board of directors and the board of directors or compensation committee of any other company, nor has any interlocking relationship existed in the past.

Code of Ethics

The Company has adopted a written code of ethics that governs the Company's employees, officers and directors. A copy of such code of ethics is available upon written request to the Company.

ITEM 11. EXECUTIVE COMPENSATION

General Philosophy

Our Board of Directors is responsible for establishing and administering the Company's executive and director compensation.

Executive Compensation

The following summary compensation table indicates the cash and non-cash compensation earned from the Company during the fiscal years ended March 31, 2018 and 2017 by the current and former executive officers of the Company and each of the other two highest paid executives or directors, if any, whose total compensation exceeded \$100,000 during those periods.

Summary Compensation Table

Name and Principal Position	Year	Salary	Bonus	Stock Awards	Option Awards	Non-Equity Incentive Plan Compensation	All Other Compensation	Total
Bill G. Williams, Chairman of the Board, CEO	2018	\$ 36,000	-	-	-	-	3,880	\$ 39,880
	2017	\$ 96,000	-	-	-	-	-	\$ 96,000
Gerald Easterling, President	2018	\$ 76,000	-	-	-	-	6,120	\$ 82,120
	2017	\$ 96,000	-	-	-	-	-	\$ 96,000

(1) As of March 31, 2018, Mr. Williams is owed accrued salary of \$60,612. In addition, Mr. Williams is entitled to receive medical insurance reimbursement, of which \$3,880 was paid during the fiscal year ending March 31, 2018, and for which \$776 is accrued as of March 31, 2018. Mr. Williams is also entitled to an automobile allowance of \$500 per month, of which none was paid, and for which \$10,500 is accrued at March 31, 2018.

(2) As of March 31, 2018, Mr. Easterling is owed accrued salary of \$86,754. In addition, Mr. Easterling is entitled to receive medical insurance reimbursement, of which \$6,120 was paid during the fiscal year ending March 31, 2018 and for which \$0 is accrued as of March 31, 2018. Mr. Easterling is also entitled to an automobile allowance of \$500 per month, of which none was paid, and for which \$12,000 is accrued at March 31, 2018.

Employment Agreements

We have employment agreements in place with Bill G. Williams, our Chief Executive Officer, and Gerald Easterling, our President.

Bill G. Williams

On April 1, 2015, the Company entered into an employment agreement with Bill G. Williams as the Company's Chief Executive Officer. The agreement is terminable at will and provides for a base annual salary of \$96,000. In addition, the agreement provides that the Mr. Williams is entitled, at the sole and absolute discretion of the Company's Board of Directors, to receive performance bonuses. Mr. Williams will also be entitled to certain benefits including health insurance and monthly allowances for cell phone and automobile expenses.

The agreement provides that in the event Mr. Williams is terminated without cause or resigns for good reason (each as defined in the agreement), Mr. Williams will receive, as severance, his base salary for a period of 60 months following the date of termination. In the event of a change of control of the Company, Mr. Williams may elect to terminate the agreement within 30 days thereafter and upon such termination would receive a lump sum payment equal to 500% of his base salary. The agreement contains certain restrictive covenants relating to non-competition, non-solicitation of customers and non-solicitation of employees for a period of one year following termination of the agreement.

Gerald Easterling

On April 1, 2015, the Company entered into an employment agreement with Gerald Easterling as the Company's President. The agreement is terminable at will and provides for a base annual salary of \$96,000. In addition, the agreement provides that the Mr. Easterling is entitled, at the sole and absolute discretion of the Company's Board of Directors, to receive performance bonuses. Mr. Easterling will also be entitled to certain benefits including health insurance and monthly allowances for cell phone and automobile expenses.

The agreement provides that in the event Mr. Easterling is terminated without cause or resigns for good reason (each as defined in the agreement), Mr. Easterling will receive, as severance, his base salary for a period of 60 months following the date of termination. In the event of a change of control of the Company, Mr. Easterling may elect to terminate the agreement within 30 days thereafter and upon such termination would receive a lump sum payment equal to 500% of his base salary.

The agreement contains certain restrictive covenants relating to non-competition, non-solicitation of customers and non-solicitation of employees for a period of one year following termination of the agreement.

Potential Payments Upon Termination or Change-in-Control

SEC regulations state that we must disclose information regarding agreements, plans or arrangements that provide for payments or benefits to our executive officers in connection with any termination of employment or change in control of the Company. Such payments are set forth above in the section entitled "Employment Agreements."

None of our executive officers or directors received, nor do we have any arrangements to pay out, any bonus, stock awards, option awards, non-equity incentive plan compensation, or non-qualified deferred compensation.

Compensation of Directors

We have no standard arrangement to compensate directors for their services in their capacity as directors. Directors are not paid for meetings attended. However, we intend to review and consider future proposals regarding board compensation. All travel and lodging expenses associated with corporate matters are reimbursed by us, if and when incurred.

Stock Option Plans - Outstanding Equity Awards at Fiscal Year End

None.

Pension Table

None.

Retirement Plans

We do not offer any annuity, pension, or retirement benefits to be paid to any of our officers, directors, or employees in the event of retirement. There are also no compensatory plans or arrangements with respect to any individual named above which results or will result from the resignation, retirement, or any other termination of employment with our company, or from a change in the control of our Company.

Compensation Committee

The Company does not have a separate Compensation Committee. Instead, the Company's Board of Directors reviews and approves executive compensation policies and practices, reviews salaries and bonuses for other officers, administers the Company's stock option plans and other benefit plans, if any, and considers other matters.

Risk Management Considerations

We believe that our compensation policies and practices for our employees, including our executive officers, do not create risks that are reasonably likely to have a material adverse effect on our Company.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

The following table sets forth certain information as of July 11, 2018, with respect to the beneficial ownership of our common stock for (i) each director and officer, (ii) all of our directors and officers as a group, and (iii) each person known to us to own beneficially five percent (5%) or more of the outstanding shares of our common stock. As of July 11, 2018, there were 135,776,879 shares of common stock outstanding.

Name and Address of Beneficial Owner ⁽¹⁾	Shares Beneficially Owned	Percentage Owned ⁽²⁾
Directors and Executive Officers		
Bill G. Williams 15150 Preston Road, Suite 300 Dallas, TX 75248	75,520,240 ⁽³⁾	55.62%
Gerald Easterling 15150 Preston Road, Suite 300 Dallas, TX 75248	75,520,240 ⁽⁴⁾	55.62%
Tom Untermeyer 15150 Preston Road, Suite 300 Dallas, TX 75248	-	0.00%
William Delgado 15150 Preston Road, Suite 300 Dallas, TX 75248	6,270,719 ⁽⁵⁾	4.62%
Total:	81,790,959	60.24%
5% Stockholders		
NaturalShrimp Holdings, Inc. 2086 N. Valley Mills Rd. Waco, TX 76710	75,520,240	55.62%
Dragon Acquisitions LLC 1621 Central Avenue Cheyenne, WY 82001	6,270,719 ⁽⁵⁾	4.62%

- (1) Beneficial ownership has been determined in accordance with Rule 13d-3 under the Exchange Act. Pursuant to the rules of the SEC, shares of common stock which an individual or group has a right to acquire within 60 days pursuant to the exercise of any option, warrant or right, or through the conversion of a security, are deemed to be outstanding for the purpose of computing the percentage ownership of such individual or group, but are not deemed to be beneficially owned and outstanding for the purpose of computing the percentage ownership of any other person shown in the table.
- (2) Based on 135,776,879 shares of our common stock issued and outstanding as of July 11, 2018.
- (3) Bill G. Williams is the indirect owner, together with Gerald Easterling, of 75,520,240 shares of common stock, which are directly held by NaturalShrimp Holdings, Inc. Mr. Williams is the Chairman of the Board and the Chief Executive Office of NaturalShrimp Holdings, Inc. and has shared voting and dispositive power over the shares held by NaturalShrimp Holdings, Inc.
- (4) Gerald Easterling is the indirect owner, together with Bill G. Williams, of 75,520,240 shares of common stock, which are directly held by NaturalShrimp Holdings, Inc. Mr. Easterling is the President of NaturalShrimp Holdings, Inc. and has shared voting and dispositive power over the shares held by NaturalShrimp Holdings, Inc.
- (5) William Delgado is the indirect owner of 6,270,719 shares of common stock, which are directly held by Dragon Acquisitions LLC. The shares of common stock beneficially owned by Dragon Acquisitions LLC, and indirectly owned by William Delgado, include 600,000 shares of common stock issuable upon conversion of outstanding convertible notes held by Dragon Acquisitions LLC. Mr. Delgado is the managing member of Dragon Acquisitions LLC and has shared voting and dispositive power over the shares held by Dragon Acquisitions LLC.

Securities Authorized for Issuance Under Equity Compensation Plans

None.

Non-Cumulative Voting

The holders of our shares of common stock do not have cumulative voting rights, which means that the holders of more than 50% of such outstanding shares, voting for the election of Directors, can elect all of the Directors to be elected, if they so choose. In such event, the holders of the remaining shares will not be able to elect any of our Directors.

Transfer Agent

Our transfer agent is Island Stock Transfer, Inc., and is located at 15500 Roosevelt Boulevard, Suite 301, Clearwater, Florida 33760. Their telephone number is (727) 289-0010.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with Related Persons

Except as set out below, as of March 31, 2018, there have been no transactions, or currently proposed transactions, in which we were or are to be a participant and the amount involved exceeds the lesser of \$120,000 or one percent of the average of our total assets at year-end for the last two completed fiscal years, and in which any of the following persons had or will have a direct or indirect material interest:

- any director or executive officer of our company;
- any person who beneficially owns, directly or indirectly, shares carrying more than 5% of the voting rights attached to our outstanding shares of common stock;
- any promoters and control persons; and
- any member of the immediate family (including spouse, parents, children, siblings and in laws) of any of the foregoing persons.

NaturalShrimp Holdings, Inc.

On November 26, 2014, Multiplayer Online Dragon, Inc., a Nevada corporation (“MYDR”), entered into an Asset Purchase Agreement (the “Agreement”) with NaturalShrimp Holdings, Inc. a Delaware corporation (“NSH”), pursuant to which MYDR was to acquire substantially all of the assets of NSH which assets consist primarily of all of the issued and outstanding shares of capital stock of NaturalShrimp Corporation (“NSC”), a Delaware corporation, and NaturalShrimp Global, Inc. (“NS Global”), a Delaware corporation, and certain real property located outside of San Antonio, Texas (the “Assets”).

On January 30, 2015, MYDR consummated the acquisition of the Assets pursuant to the Agreement. In accordance with the terms of the Agreement, the MYDR issued 75,520,240 shares of its common stock to NSH as consideration for the Assets. As a result of the transaction, NSH acquired 88.62% of MYDR’s issued and outstanding shares of common stock, NSC and NS Global became MYDR’s wholly-owned subsidiaries, and MYDR changed its principal business to a global shrimp farming company.

There were no material relationships between the MYDR and NSH or between the Company’s or NSH’s respective affiliates, directors, or officers or associates thereof, other than in respect of the Agreement. Effective March 3, 2015, MYDR amended its Articles of Incorporation to change its name to “NaturalShrimp Incorporated”.

On January 1, 2016 we entered into a note payable agreement with NSH. Between January 16, 2016 and March 7, 2016, we borrowed \$134,750 under this agreement. An additional \$601,361 was borrowed under this agreement in the year ended March 31, 2017. The note payable has no set monthly payment or maturity date with a stated interest rate of 2%.

Bill G. Williams

We have entered into several working capital notes payable to Bill Williams, an officer, a director, and a shareholder of the Company, for a total of \$486,500 since inception. These notes are demand notes, had stock issued in lieu of interest and have no set monthly payment or maturity date. The balance of these notes at March 31, 2018 and 2017 was \$426,404 and \$426,404, respectively, and is classified as a current liability on the consolidated balance sheets. At March 31, 2018 and 2017, accrued interest payable was \$206,920 and \$172,808, respectively. We repaid \$0 during the years ended March 31, 2018 and 2017.

William Delgado

Between January 1, 2017 and March 31, 2017, we entered into two Private Placement Subscription Agreements and issued two Six Percent (6%) Unsecured Convertible Notes to Dragon Acquisitions, whose managing member is William Delgado, the Treasurer, Chief Financial Officer, and a director of the Company. The first note was issued on January 20, 2017, in the principal amount of \$20,000, and the second note was issued on March 14, 2017, in the principal amount of \$20,000. The notes accrue interest at the rate of six percent (6%) per annum, and mature one (1) year from the date of issuance. Upon an event of default, the default interest rate will be increased to twenty-four percent (24%), and the total amount of principal and accrued interest shall become immediately due and payable at the holder's discretion. The notes are convertible into shares of our common stock at a conversion price of \$0.30 per share, subject to adjustment. The notes were repaid in full between March and May 2017.

On April 20, 2017, the Company issued an additional Six Percent (6%) Unsecured Convertible Note to Dragon Acquisitions in the principal amount of \$140,000. The note accrues interest at the rate of six percent (6%) per annum, and matures one (1) year from the date of issuance. Upon an event of default, the default interest rate will be increased to twenty-four percent (24%), and the total amount of principal and accrued interest shall become immediately due and payable at the holder's discretion. The note is convertible into shares of the Company's common stock at a conversion price of \$0.30 per share, subject to adjustment. \$52,400 of the note has been repaid during the year ended March 31, 2018.

Gerald Easterling

On January 10, 2017, we entered into a promissory note agreement with Community National Bank in the principal amount of \$245,000, with an annual interest rate of 5% and a maturity date of January 10, 2020 (the "CNB Note"). The CNB Note is secured by certain real property owned by the Company in La Coste, Texas, and is also personally guaranteed by the Company's President and Chairman of the Board, as well as certain non-affiliated shareholders of the Company. As consideration for the guarantee, the Company issued 600,000 shares of common stock to the guaranteeing shareholders, not including the Company's President and Chairman of the Board, which was recognized as debt issuance costs. The fair value of this issuance is estimated to be \$264,000, based on the market value of our common stock on the date of issuance. The balance of the CNB Note is \$236,413 as of March 31, 2018.

Named Executive Officers and Current Directors

For information regarding compensation for our named executive officers and current directors, see "Executive Compensation".

Director Independence

Our board of directors consists of Bill G. Williams, Gerald Easterling and William Delgado. Our securities are quoted on the OTC Markets Group, which does not have any director independence requirements. We evaluate independence by the standards for director independence established by applicable laws, rules, and listing standards including, without limitation, the standards for independent directors established by The New York Stock Exchange, Inc., the NASDAQ National Market, and the Securities and Exchange Commission.

Subject to some exceptions, these standards generally provide that a director will not be independent if (a) the director is, or in the past three years has been, an employee of ours; (b) a member of the director's immediate family is, or in the past three years has been, an executive officer of ours; (c) the director or a member of the director's immediate family has received more than \$120,000 per year in direct compensation from us other than for service as a director (or for a family member, as a non-executive employee); (d) the director or a member of the director's immediate family is, or in the past three years has been, employed in a professional capacity by our independent public accountants, or has worked for such firm in any capacity on our audit; (e) the director or a member of the director's immediate family is, or in the past three years has been, employed as an executive officer of a company where one of our executive officers serves on the compensation committee; or (f) the director or a member of the director's immediate family is an executive officer of a company that makes payments to, or receives payments from, us in an amount which, in any twelve-month period during the past three years, exceeds the greater of \$1,000,000 or two percent of that other company's consolidated gross revenues. Based on these standards, we have determined that none of our directors are independent directors.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Audit and Accounting Fees

Effective April 11, 2015, the Board of Directors of the Company engaged Turner, Stone & Company ("TSC") as its independent registered public accounting firm to audit the Company's annual financial statements. The following tables set forth the fees billed to the Company for professional services rendered by TSC for the years ended March 31, 2018 and 2017:

Services	2018	2017
Audit fees	\$ 26,250	\$ 29,300
Audit related fees	-	-
Tax fees	-	-
All other fees	-	-
Total fees	\$ 26,250	\$ 29,300

Audit Fees

The audit fees were paid for the audit services of our annual and quarterly reports and issuing consents for our registration statements.

Tax Fees

There were no tax fees paid to TSC.

Pre-Approval Policies and Procedures

Our board of directors preapproves all services provided by our independent registered public accounting firm. All of the above services and fees were reviewed and approved by the board of directors before the respective services were rendered.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of NaturalShrimp Incorporated.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of NaturalShrimp Incorporated (the "Company") as of March 31, 2018 and 2017, and the related consolidated statements of operations, changes in stockholders' deficit, and cash flows for the years then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2018 and 2017, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Explanatory Paragraph – Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered significant losses from inception and has a significant working capital deficit. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Turner, Stone & Company, L.L.P.

Dallas, Texas
July 13, 2018

We have served as the Company's auditor since 2015.

NATURALSHRIMP INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – NATURE OF THE ORGANIZATION AND BUSINESS

Nature of the Business

NaturalShrimp Incorporated (“NaturalShrimp” “the Company”), a Nevada corporation, is a biotechnology company and has developed a proprietary technology that allows it to grow Pacific White shrimp (*Litopenaeus vannamei*, formerly *Penaeus vannamei*) in an ecologically controlled, high-density, low-cost environment, and in fully contained and independent production facilities. The Company’s system uses technology which allows it to produce a naturally-grown shrimp “crop” weekly, and accomplishes this without the use of antibiotics or toxic chemicals. The Company has developed several proprietary technology assets, including a knowledge base that allows it to produce commercial quantities of shrimp in a closed system with a computer monitoring system that automates, monitors and maintains proper levels of oxygen, salinity and temperature for optimal shrimp production. Its initial production facility is located outside of San Antonio, Texas.

The Company has three wholly-owned subsidiaries including NaturalShrimp Corporation, NaturalShrimp Global, Inc. and Natural Aquatic Systems, Inc.

Going Concern

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, assuming the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. For the year ended March 31, 2018, the Company had a net loss of approximately \$5,285,000. At March 31, 2018, the Company had an accumulated deficit of approximately \$34,013,000 and a working capital deficit of approximately \$6,764,000. These factors raise substantial doubt about the Company’s ability to continue as a going concern, within one year from the issuance date of this filing. The Company’s ability to continue as a going concern is dependent on its ability to raise the required additional capital or debt financing to meet short and long-term operating requirements. During the 2018 fiscal year, the Company received net cash proceeds of approximately \$1,088,000 from the issuance of convertible debentures, \$180,000 from the issuance of convertible debt to a related party and \$25,000 from the sale of the Company’s common stock. Subsequent to March 31, 2018, the Company received \$105,000 in net proceeds from three convertible debentures (See Note 12). Management believes that private placements of equity capital and/or additional debt financing will be needed to fund the Company’s long-term operating requirements. The Company may also encounter business endeavors that require significant cash commitments or unanticipated problems or expenses that could result in a requirement for additional cash. If the Company raises additional funds through the issuance of equity or convertible debt securities, the percentage ownership of its current shareholders could be reduced, and such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, the Company may not be able to take advantage of prospective business endeavors or opportunities, which could significantly and materially restrict our operations. The Company continues to pursue external financing alternatives to improve its working capital position. If the Company is unable to obtain the necessary capital, the Company may have to cease operations.

The Company plans to improve the growth rate of the shrimp and the environmental conditions of its production facilities. Management also plans to acquire a hatchery in which the Company can better control the environment in which to develop the post larvae. If management is unsuccessful in these efforts, discontinuance of operations is possible. The consolidated financial statements do not include any adjustments that might result from the outcome of these uncertainties.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation

The consolidated financial statements include the accounts of NaturalShrimp Incorporated and its wholly-owned subsidiaries, NaturalShrimp Corporation, NaturalShrimp Global and Natural Aquatic Systems, Inc. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

Preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Basic and Diluted Earnings/Loss per Common Share

Basic and diluted earnings or loss per share (“EPS”) amounts in the consolidated financial statements are computed in accordance with ASC 260 – 10 *‘Earnings per Share’*, which establishes the requirements for presenting EPS. Basic EPS is based on the weighted average number of common shares outstanding. Diluted EPS is based on the weighted average number of common shares outstanding and dilutive common stock equivalents. Basic EPS is computed by dividing net income or loss available to common stockholders (numerator) by the weighted average number of common shares outstanding (denominator) during the period. For the year ended March 31, 2018, the Company had approximately \$1,293,000 in convertible debentures whose approximately 46,170,000 underlying shares are convertible at the holders’ option at conversion prices ranging from 34 - 60% of the defined trading price and approximately 4,625,000 warrants with an exercise price of 50% to 57% of the market price of the Company’s common stock, which were not included in the calculation of diluted EPS as their effect would be anti-dilutive. Included in the diluted EPS for the year ended March 31, 2017, the Company had \$150,000 in convertible debentures whose underlying shares are convertible at the holders’ option at initial fixed conversion prices ranging from \$0.30 to \$0.35.

Fair Value Measurements

ASC Topic 820, *“Fair Value Measurement”*, requires that certain financial instruments be recognized at their fair values at our balance sheet dates. However, other financial instruments, such as debt obligations, are not required to be recognized at their fair values, but Generally Accepted Accounting Principles in the United States (“GAAP”) provides an option to elect fair value accounting for these instruments. GAAP requires the disclosure of the fair values of all financial instruments, regardless of whether they are recognized at their fair values or carrying amounts in our balance sheets. For financial instruments recognized at fair value, GAAP requires the disclosure of their fair values by type of instrument, along with other information, including changes in the fair values of certain financial instruments recognized in income or other comprehensive income. For financial instruments not recognized at fair value, the disclosure of their fair values is provided below under *“Financial Instruments.”*

Nonfinancial assets, such as property, plant and equipment, and nonfinancial liabilities are recognized at their carrying amounts in the Company’s balance sheets. GAAP does not permit nonfinancial assets and liabilities to be remeasured at their fair values. However, GAAP requires the remeasurement of such assets and liabilities to their fair values upon the occurrence of certain events, such as the impairment of property, plant and equipment. In addition, if such an event occurs, GAAP requires the disclosure of the fair value of the asset or liability along with other information, including the gain or loss recognized in income in the period the remeasurement occurred.

The Company did not have any Level 1 or Level 2 assets and liabilities at March 31, 2018 and 2017.

The Derivative liabilities are Level 3 fair value measurements.

The following is a summary of activity of Level 3 liabilities during the year ended March 31, 2018:

Derivative liability balance at March 31, 2017	\$ 218,000
Additions to derivative liability for new debt	2,213,000
Reclass to equity upon conversion	(236,000)
Derecognition of notes redeemed for cash	(340,000)
Change in fair value	1,600,000
Balance at March 31, 2018	<u>\$ 3,455,000</u>

At March 31, 2018, the fair value of the derivative liabilities of convertible notes was estimated using the following weighted-average inputs: the price of the Company's common stock of \$0.06; a risk-free interest rate ranging from 1.73% to 2.09%, and expected volatility of the Company's common stock ranging from 272.06% to 375.93%, and the various estimated reset exercise prices weighted by probability.

Financial Instruments

The Company's financial instruments include cash and cash equivalents, receivables, payables, and debt and are accounted for under the provisions of ASC Topic 825, "Financial Instruments". The carrying amount of these financial instruments, with the exception of discounted debt, as reflected in the consolidated balance sheets approximates fair value.

Cash and Cash Equivalents

For the purpose of the consolidated statements of cash flows, the Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents. There were no cash equivalents at March 31, 2018 and 2017.

Fixed Assets

Equipment is carried at historical value or cost and is depreciated over the estimated useful lives of the related assets. Depreciation on buildings is computed using the straight-line method, while depreciation on all other fixed assets is computed using the Modified Accelerated Cost Recovery System (MACRS) method, which does not materially differ from GAAP. Estimated useful lives are as follows:

Buildings	27.5 – 39 years
Other Depreciable Property	5 – 10 years
Furniture and Fixtures	3 – 10 years

Maintenance and repairs are charged to expense as incurred. At the time of retirement or other disposition of equipment, the cost and accumulated depreciation will be removed from the accounts and the resulting gain or loss, if any, will be reflected in operations.

The consolidated statements of operations reflect depreciation expense of approximately \$71,000 and \$60,000 for the years ended March 31, 2018 and 2017, respectively.

Income Taxes

Deferred income tax assets and liabilities are computed for differences between the financial statement and tax basis of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

In addition, the Company's management performs an evaluation of all uncertain income tax positions taken or expected to be taken in the course of preparing the Company's income tax returns to determine whether the income tax positions meet a "more likely than not" standard of being sustained under examination by the applicable taxing authorities. This evaluation is required to be performed for all open tax years, as defined by the various statutes of limitations, for federal and state purposes.

On December 22, 2017, the President of the United States signed and enacted into law H.R. 1 (the "Tax Reform Law"). The Tax Reform Law, effective for tax years beginning on or after January 1, 2018, except for certain provisions, resulted in significant changes to existing United States tax law, including various provisions that are expected to impact the Company. The Tax Reform Law reduces the federal corporate tax rate from 35% to 21% effective January 1, 2018. The Company will continue to analyze the provisions of the Tax Reform Law to assess the impact on the Company's consolidated financial statements.

Stock-Based Compensation

The Company accounts for stock-based compensation to employees in accordance with ASC 718. "Stock-based Compensation to Employees" is measured at the grant date, based on the fair value of the award, and is recognized as expense over the requisite employee service period. The Company accounts for stock-based compensation to other than employees in accordance with ASC 505-50 "Equity Instruments Issued to Other than Employees" and are valued at the earlier of a commitment date or upon completion of the services, based on the fair value of the equity instruments and is recognized as expense over the service period. The Company estimates the fair value of stock-based payments using the Black-Scholes option-pricing model for common stock options and warrants and the closing price of the Company's common stock for common share issuances. Once the stock is issued the appropriate expense account is charged.

Impairment of LongLived Assets and LongLived Assets

The Company will periodically evaluate the carrying value of longlived assets to be held and used when events and circumstances warrant such a review and at least annually. The carrying value of a longlived asset is considered impaired when the anticipated undiscounted cash flow from such asset is separately identifiable and is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the longlived asset. Fair value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on longlived assets to be disposed of are determined in a similar manner, except that fair values are reduced for the cost to dispose.

Commitments and Contingencies

Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company's management and its legal counsel assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company's legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's consolidated financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the nature of the guarantee would be disclosed.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers,” which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for annual reporting periods for public business entities beginning after December 15, 2017, including interim periods within that reporting period. The new standard permits the use of either the retrospective or cumulative effect transition method. The Company is currently evaluating the effect that ASU 2014-09 will have on its financial statements and related disclosures. As there have been no significant revenues to date, the Company does not expect the adoption to have a material impact and no transition method will be necessary upon adoption.

In February 2016, the FASB issued ASU No. 2016-02, *Leases* (Topic 842) The standard requires all leases that have a term of over 12 months to be recognized on the balance sheet with the liability for lease payments and the corresponding right-of-use asset initially measured at the present value of amounts expected to be paid over the term. Recognition of the costs of these leases on the income statement will be dependent upon their classification as either an operating or a financing lease. Costs of an operating lease will continue to be recognized as a single operating expense on a straight-line basis over the lease term. Costs for a financing lease will be disaggregated and recognized as both an operating expense (for the amortization of the right-of-use asset) and interest expense (for interest on the lease liability). This standard will be effective for our interim and annual periods beginning January 1, 2019, and must be applied on a modified retrospective basis to leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. We are currently evaluating the timing of adoption and the potential impact of this standard on our financial position, but we do not expect it to have a material impact on our results of operations.

During the year ended March 31, 2018, there were several new accounting pronouncements issued by the Financial Accounting Standards Board. Each of these pronouncements, as applicable, has been or will be adopted by the Company. Management does not believe the adoption of any of these accounting pronouncements has had or will have a material impact on the Company’s consolidated financial statements.

Management’s Evaluation of Subsequent Events

The Company evaluates events that have occurred after the balance sheet date of March 31, 2018, through the date which the consolidated financial statements were issued. Based upon the review, other than described in Note 12 – Subsequent Events, the Company did not identify any recognized or non-recognized subsequent events that would have required adjustment or disclosure in the consolidated financial statements.

NOTE 3 – SHORT-TERM NOTE AND LINES OF CREDIT

On November 3, 2015, the Company entered into a short-term note agreement with Community National Bank for a total value of \$50,000. The short-term note has a stated interest rate of 5.25%, maturity date of December 15, 2017 and had an initial interest only payment on February 3, 2016. The short-term note is guaranteed by an officer and director. The balance of the line of credit at both March 31, 2018 and 2017 was \$25,298.

The Company also has a working capital line of credit with Extraco Bank. On April 30, 2018, the Company renewed the line of credit for \$475,000. The line of credit bears an interest rate of 5.0% that is compounded monthly on unpaid balances and is payable monthly. The line of credit matures on April 30, 2019, and is secured by certificates of deposit and letters of credit owned by directors and shareholders of the Company. The balance of the line of credit is \$472,675 and \$473,029 at March 31, 2018 and March 31, 2017, respectively, included in non-current liabilities.

The Company also has additional lines of credit with Extraco Bank for \$100,000 and \$200,000, which were renewed on January 19, 2018 and April 30, 2018, respectively, with maturity dates of January 19, 2019 and April 30, 2019, respectively. The \$200,000 line of credit is included in non-current liabilities as of March 31, 2018, with an outstanding balance of \$178,778. The lines of credit bear an interest rate of 4.5% (increased to 6.5% and 5%, respectively, upon renewal in 2017) that is compounded monthly on unpaid balances and is payable monthly. They are secured by certificates of deposit and letters of credit owned by directors and shareholders of the Company. The balance of the lines of credit was \$278,470 at both March 31, 2018 and March 31, 2017.

The Company also has a working capital line of credit with Capital One Bank for \$50,000. The line of credit bears an interest rate of prime plus 25.9 basis points, which totaled 30.7% as of March 31, 2018. The line of credit is unsecured. The balance of the line of credit was \$9,580 at both March 31, 2018 and March 31, 2017.

The Company also has a working capital line of credit with Chase Bank for \$25,000. The line of credit bears an interest rate of prime plus 10 basis points, which totaled 14.75% as of March 31, 2018. The line of credit is secured by assets of the Company's subsidiaries. The balance of the line of credit is \$10,237 and \$11,197 at March 31, 2018 and March 31, 2017, respectively.

NOTE 4 – BANK LOAN

On January 10, 2017, the Company entered into a promissory note with Community National Bank for \$245,000, at an annual interest rate of 5% and a maturity date of January 10, 2020 (the "CNB Note"). The CNB Note is secured by certain real property owned by the Company in LaCoste, Texas, and is also personally guaranteed by the Company's President, as well as certain shareholders of the Company. As consideration for the guarantee, the Company issued 600,000 of its common stock to the shareholders, which was recognized as debt issuance costs with a fair value of \$264,000, based on the market value of the Company's common stock of \$0.44 on the date of issuance. As the fair value of the debt issuance costs exceeded the face amount of the promissory note, the excess of the fair value was recognized as financing costs in the statement of operations. The resulting debt discount is to be amortized over the term of the CNB Note under the effective interest method. As the debt discount is in excess of the face amount of the promissory note, the effective interest rate is not determinable, and as such, all of the discount was immediately expensed.

Maturities on Bank loan is as follows:

Years ending:		
March 31, 2019	\$	7,497
March 31, 2020		228,916
	\$	<u>236,413</u>

NOTE 5 – CONVERTIBLE DEBENTURES

January Debentures

On January 23, 2017, the Company entered into a Securities Purchase Agreement ("January SPA") for the sale of a convertible debenture ("January debenture") with an original principal amount of \$262,500, for consideration of \$250,000, with a prorated five percent original issue discount ("OID"). The debenture has a one-time interest charge of twelve percent applied on the issuance date and due on the maturity date, which is two years from the date of each payment of consideration. The January SPA included a warrant to purchase 350,000 shares of the Company's common stock. The warrants have a five year term and vest such that the buyer shall receive 1.4 warrants for every dollar funded to the Company under the January debenture. The Company received \$50,000 at closing, with additional consideration to be paid at the holder's option. Upon the closing the buyer was granted a warrant to purchase 70,000 shares of the Company's common stock.

The January debentures are convertible at an original conversion price of \$0.35, subject to adjustment if the Company's common stock trades at a price lower than \$0.60 per share during the forty-five day period immediately preceding August 15, 2017, in which case the conversion price is reset to sixty percent of the lowest trade occurring during the twenty-five days prior to the conversion date. Additionally, the conversion price, as well as other terms including interest rates, original issue discounts, warrant coverage, adjusts if any future financings have more favorable terms. The January debenture also has piggyback registration rights.

The conversion feature of the January debenture meets the definition of a derivative and due to the adjustment to the conversion price to occur upon subsequent sales of securities at a price lower than the original conversion price, requires bifurcation and is accounted for as a derivative liability. The derivative was initially recognized at an estimated fair value of \$85,000 and created a discount on the January debentures that will be amortized over the life of the debentures using the effective interest rate method. The fair value of the embedded derivative is measured and recognized at fair value each subsequent reporting period and the changes in fair value are recognized in the Consolidated Statement of Operations as a change in fair value of derivative liability.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.46 at issuance date; a risk free interest rate of 1.16% and expected volatility of the Company's common stock, of 384.75%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$35,000 was immediately expensed as Financing costs. As the discount was in excess of the face amount of the debenture, the effective interest rate is not determinable, and as such, all of the discount was immediately expensed.

The derivative was remeasured as of March 31, 2017, resulting in an estimated fair value of \$74,000, for a decrease in fair value of \$11,000. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.40; a risk free interest rate of 1.16% and expected volatility of the Company's common stock, of 388.06%, and the various estimated reset exercise prices weighted by probability.

During the three months ended September 30, 2017, the holder converted \$40,000 of the January debentures to common shares of the Company, leaving outstanding principal of \$10,000 as of September 30, 2017. As a result of the conversion the derivative liability was remeasured immediately prior to the conversion with a fair value of \$55,000, with an increase of \$2,000 recognized, with the fair value of the derivative liability related to the converted portion, of \$44,000 being reclassified to equity. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.17; a risk-free interest rate of 1.12% and expected volatility of the Company's common stock, of 190.70%, and the various estimated reset exercise prices weighted by probability.

During the three months ended December 31, 2017, the holder converted the remaining \$10,000 of the January debentures to common shares of the Company. As a result of the conversion the derivative liability was remeasured immediately prior to the conversion with a fair value of \$16,000, with an increase of \$4,000 recognized, with the fair value of the derivative liability related to the converted portion being reclassified to equity. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.10; a risk-free interest rate of 1.46% and expected volatility of the Company's common stock, of 200.17%, and the various estimated reset exercise prices weighted by probability.

The warrants have an original exercise price of \$0.60, which adjusts for any future dilutive issuances. As a result of the dilutive issuance adjustment provision, the warrants have been classified out of equity as a warrant liability. The Company estimated the fair value of the warrant liability using the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.46 at issuance date; a risk free interest rate of 1.88% and expected volatility of the Company's common stock, of 309.96%, resulting in a fair value of \$32,000. As noted above, the calculated fair value of the discount is greater than the face amount of the debt, and therefore, the excess amount of \$32,000 was immediately expensed as Financing costs.

March Debentures

On March 28, 2017, the Company entered into a Securities Purchase Agreement (“SPA”) for the purchase of up to \$400,000 in convertible debentures (“March debentures”), due 3 years from issuance. The SPA consists of three separate convertible debentures, the first purchase which occurred at the signing closing date on March 28, 2017, for \$100,000 with a purchase price of \$90,000 (an OID of \$10,000). The second closing is to occur by mutual agreement of the buyer and Company, at any time sixty to ninety days following the signing closing date, for \$150,000 with a purchase price of \$135,000 (an OID of \$15,000). The third closing is to occur sixty to ninety days after the second closing for \$150,000 with a purchase price of \$135,000 (an OID of \$15,000). The SPA also includes a commitment fee to include 100,000 restricted shares of common stock of the Company upon the signing closing date. The commitment shares fair value was calculated as \$34,000, based on the market value of the common shares at the closing date of \$0.34, and was recognized as a debt discount. The conversion price is fixed at \$0.30 for the first 180 days. After 180 days, or in the event of a default, the conversion price becomes the lower of \$0.30 or 60% (or 55% based on certain conditions) of the lowest closing bid price for the past 20 days.

On July 5, 2017, the March Debenture was amended. The total principal amount of the convertible debentures issuable under the SPA was reduced to \$325,000, for a total purchase price of \$292,500, and the second closing was reduced to \$75,000 with a purchase price of \$67,500. The second closing occurred on July 5, 2017. As a fee in connection with the second closing, the Company issued 75,000 of its restricted common shares to the debenture holder. The fair value of the fee shares was calculated as \$26,625, based on the market value of the common shares at the closing date of \$0.36, which will be recognized as a debt discount and amortized over the life of the note with a 34.4% effective interest rate.

The conversion feature of the March debenture meets the definition of a derivative as it would not be classified as equity were it a stand-alone instrument, and therefore requires bifurcation and is accounted for as a derivative liability. The derivative was initially recognized at an estimated fair value of \$170,000 and created a discount on the March debentures that will be amortized over the life of the debentures using the effective interest rate method. The fair value of the embedded derivative is measured and recognized at fair value each subsequent reporting period and the changes in fair value are recognized in the Consolidated Statement of Operations as Change in fair value of derivative liability.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company’s common stock of \$0.40 at issuance date; a risk free interest rate of 1.56% and expected volatility of the Company’s common stock, of 333.75%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$104,000, including the commitment fees, was immediately expensed as financing costs.

The debenture is also redeemable at the option of the Company, at amounts ranging from 105% to 140% of the principal and accrued interest balance, based on the redemption date’s passage of time ranging from 90 days to 180 days from the date of issuance of each debenture.

On September 22, 2017, the Company exercised its option to redeem the first closing of the March debenture, for a redemption price at \$130,000, 130% of the principal amount. The principal of \$100,000 was derecognized with the additional \$30,000 paid upon redemption recognized as a financing cost. As a result of the redemption, the unamortized discount related to the converted balance of \$91,667 was immediately expensed. Additionally, the derivative was remeasured upon redemption of the debenture, resulting in an estimated fair value of \$189,000, for an increase in fair value of \$45,000. The key valuation assumptions used consist, in part, of the price of the Company’s common stock of \$0.17; a risk-free interest rate of 1.58% and expected volatility of the Company’s common stock, of 290.41%, and the various estimated reset exercise prices weighted by probability.

On December 28, 2017, the Company exercised its option to redeem the second closing of the March debenture, for a redemption price at \$97,500, 130% of the principal amount. Upon redemption, the principal of \$75,000 was relieved, with the additional \$22,500 paid recognized as a financing cost. As a result of the redemption, the unamortized discount related to the converted balance of \$68,750 was immediately expensed. Additionally, the derivative was remeasured upon redemption of the debenture, resulting in an estimated fair value of \$151,000, for an increase in fair value of \$63,000. The key valuation assumptions used consist, in part, of the price of the Company’s common stock of \$0.15; a risk-free interest rate of 1.89% and expected volatility of the Company’s common stock, of 260.54%, and the various estimated reset exercise prices weighted by probability.

July Debenture

On July 31, 2017, the Company entered into a 5% Securities Purchase Agreement. The agreement calls for the purchase of up to \$135,000 in convertible debentures, due 12 months from issuance, with a \$13,500 OID. The first closing was for principal of \$45,000 with a purchase price of \$40,500 (an OID of \$4,500), with additional closings at the sole discretion of the holder. On October 2, 2017, the Company entered into a second closing of the July 31, 2017 debenture, in the principal amount of \$22,500 for a purchase price of \$20,250, with \$1,500 deducted for legal fees, resulting in net cash proceeds of \$18,750. The July 31 debenture is convertible at a conversion price of 60% of the lowest trading price during the twenty-five days prior to the conversion date, and is also subject to equitable adjustments for stock splits, stock dividends or rights offerings by the Company. A further adjustment occurs if the trading price at any time is equal to or lower than \$0.10, whereby an additional 10% discount to the market price shall be factored into the conversion rate, as well as an adjustment to occur upon subsequent sales of securities at a price lower than the original conversion price. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability.

On February 5, 2018, the Company entered into an amendment to the July Debenture, whereby in exchange for a payment of \$6,500 the note holder, except for a conversion of up to 125,000 shares of the Company's common shares, would be only entitled to effectuate a conversion under the note on or after March 2, 2018.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$61,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.33 at issuance date; a risk-free interest rate of 1.23% and expected volatility of the Company's common stock, of 192.43%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$45,500, including the commitment fees, was immediately expensed as financing costs.

On February 20, 2018, the holder converted \$4,431 of the January debentures into 125,000 common shares of the Company. As a result of the conversion the derivative liability relating to the portion converted was remeasured immediately prior to the conversion with a fair value of \$11,000, with an increase of \$4,000 recognized, with the fair value of the derivative liability related to the converted portion being reclassified to equity. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.12; a risk-free interest rate of 1.87% and expected volatility of the Company's common stock, of 353.27%, and the various estimated reset exercise prices weighted by probability.

During March, 2018, the holder converted an additional \$17,113 of the July debentures into 630,000 common shares of the Company. As a result of the conversion the derivative liability was remeasured immediately prior to the conversion with a fair value of \$138,000, with an increase of \$74,000 recognized, with the fair value of the derivative liability related to the converted portion being reclassified to equity. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.11; a risk-free interest rate of 1.77% and expected volatility of the Company's common stock, of 375.93%, and the various estimated reset exercise prices weighted by probability. Subsequent to year end the remainder of the two notes were fully converted.

Additionally, with each tranche under the note, the Company shall issue a warrant to purchase an amount of shares of its common stock equal to the face value of each respective tranche divided by \$0.60 as a commitment fee. The Company issued a warrant to purchase 75,000 shares of the Company's common stock with the first closing, with an exercise price of \$0.60. The warrant has an anti-dilution provision for future issuances, whereby the exercise price would reset. The exercise price was adjusted to \$0.15 and the warrants issued increased to 300,000, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. As a result of the dilutive issuance adjustment provision, the warrants have been classified out of equity as a warrant liability. The Company estimated the fair value of the warrant liability using the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.33 at issuance date; a risk-free interest rate of 1.84% and expected volatility of the Company's common stock, of 316.69%, resulting in a fair value of \$25,000.

August Debenture

On August 28, 2017, the Company entered into a 12% convertible promissory note for \$110,000, with an OID of \$10,000, which matures on February 28, 2018. The note is convertible at a variable conversion rate that is the lesser of 60% of the lowest trading price for last 20 days prior to issuance of the note or 60% of the lowest market price over the 20 days prior to conversion. The conversion price shall be adjusted upon subsequent sales of securities at a price lower than the original conversion price. There are additional adjustments to the conversion price for events set forth in the agreement, including if the Company is not DTC eligible, the Company is no longer a reporting company, or the note cannot be converted into free trading shares on or after nine months from issue date. Per the agreement, the Company is required at all times to have authorized and reserved five times the number of shares that is actually issuable upon full conversion of the note. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability. The note was sold to the holder of the January 29, 2018 note (below) on February 8, 2018, with an amendment entered into to extend the note until March 5, 2018. In exchange for a cash payment of \$5,000 and the issuance of 50,000 shares of common stock, on March 5, 2018, the holder agreed to not convert any of the outstanding debt into common stock of the Company until April 8, 2018. Subsequent to year end the new holder issued a waiver as to the maturity date of the note and a technical default provision. The note has subsequently been fully converted.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$150,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.17 at issuance date; a risk-free interest rate of 1.12% and expected volatility of the Company's common stock, of 190.70%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$116,438, was immediately expensed as financing costs.

In connection with the note, the Company issued 50,000 warrants, exercisable at \$0.20, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The exercise price was adjusted to \$0.15 and the warrants outstanding increased to 66,667, upon a warrant issuance related to a new convertible debenture on September 11, 2017. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. As a result of the dilutive issuance adjustment provision, the warrants have been classified out of equity as a warrant liability. The Company estimated the fair value of the warrant liability using the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.17 at issuance date; a risk-free interest rate of 1.74% and expected volatility of the Company's common stock, of 276.90%, resulting in a fair value of \$8,000.

Additionally, in connection with the debenture the Company also issued 343,750 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$58,438, based on the market value of the common shares at the closing date of \$0.17, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date. On February 22, 2018, in connection with the sale of the note to the January 29, 2019 note holder, 171,965 of the shares were returned to the Company and cancelled. The remaining shares are not required to be returned to the Company, as the note was not redeemed prior to the date 180 days following the issue date.

On October 31, 2017, there was a second closing to the August debenture, in the principal amount of \$66,000, maturing on April 30, 2018. The second closing has the same conversion terms as the first closing, however there were no additional warrants issued with the second closing. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability. Subsequent to year end the holder issued a waiver as to the maturity date of the note and a technical default provision. The note has subsequently been fully converted.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$94,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.11 at issuance date; a risk-free interest rate of 1.28% and expected volatility of the Company's common stock, of 193.79%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$69,877, was immediately expensed as financing costs.

Additionally, in connection with the second closing, the Company also issued 332,500 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$35,877, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount. The shares are to be returned to the Treasury of the Company in the event the debenture is fully repaid prior to the date which is 180 days following the issue date.

September 11, 2017 Debenture

On September 11, 2017, the Company entered into a 12% convertible promissory note for \$146,000, with an OID of \$13,500, which matures on June 11, 2018. The note is convertible at a variable conversion rate that is the lower of the trading price for last 25 days prior to issuance of the note or 50% of the lowest market price over the 25 days prior to conversion. Furthermore, the conversion rate may be adjusted downward if, within three business days of the transmittal of the notice of conversion, the common stock has a closing bid which is 5% or lower than that set forth in the notice of conversion. There are additional adjustments to the conversion price for events set forth in the agreement, if any third party has the right to convert monies at a discount to market greater than the conversion price in effect at that time then the holder, may utilize such greater discount percentage. Per the agreement, the Company is required at all times to have authorized and reserved seven times the number of shares that is actually issuable upon full conversion of the note. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability. Subsequent to year end approximately \$85,000 of the note was converted.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$269,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.17 at issuance date; a risk-free interest rate of 1.16% and expected volatility of the Company's common stock, of 190.70%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$168,250, was immediately expensed as financing costs.

In connection with the note, the Company issued 243,333 warrants, exercisable at \$0.15, with a five-year term. The exercise price is adjustable upon certain events, as set forth in the agreement, including for future dilutive issuance. The warrants exercise price was subsequently reset to 50% of the market price during the third quarter of fiscal 2018, and the warrants issued increased accordingly. As a result of the dilutive issuance adjustment provision, the warrants have been classified out of equity as a warrant liability. The Company estimated the fair value of the warrant liability using the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.13 at issuance date; a risk-free interest rate of 1.71% and expected volatility of the Company's common stock, of 276.90%, resulting in a fair value of \$32,000.

September 12, 2017 Debenture

On September 12, 2017, the Company entered into a 12% convertible promissory note for principal amount of \$96,500 with a \$4,500 OID, which matures on June 12, 2018. The note is able to be prepaid prior to the maturity date, at a cash redemption premium, at various stages as set forth in the agreement. The note is convertible commencing 180 days after issuance date (or upon an event of Default), or March 11, 2018, with a variable conversion rate at 60% of market price, defined as the lowest trading price during the twenty days prior to the conversion date. Additionally, the conversion price adjusts if the Company is not able to issue the shares requested to be converted, or upon any future financings have more favorable terms. Per the agreement, the Company is required at all times to have authorized and reserved six times the number of shares that is actually issuable upon full conversion of the note. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability.

On March 20, 2018, the holder converted \$32,500 of the September 12, 2017 debentures into 1,031,746 common shares of the Company. As a result of the conversion the derivative liability was remeasured immediately prior to the conversion with a fair value of \$318,000, with an increase of \$165,000 recognized, with the fair value of the derivative liability related to the converted portion of \$107,000 being reclassified to equity. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.09; a risk-free interest rate of 1.81% and expected volatility of the Company's common stock, of 375.93%, and the various estimated reset exercise prices weighted by probability. Subsequent to year end the remainder of the note has been fully converted.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$110,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.13 at issuance date; a risk-free interest rate of 1.16% and expected volatility of the Company's common stock, of 190.70%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$18,000 was immediately expensed as financing costs.

October 17, 2017 Debenture

On September 28, 2017, the Company entered into a Securities Purchase Agreement, pursuant to which the Company agreed to sell a 12% Convertible Note for \$55,000 with a maturity date of September 28, 2018, for a purchase price of \$51,700, and \$2,200 deducted for legal fees, resulting in net cash proceeds of \$49,500. The effective closing date of the Securities Purchase Agreement and Note is October 17, 2017. The note is convertible at the holders' option, at any time, at a conversion price equal to the lower of (i) the closing sale price of the Company's common stock on the closing date, or (ii) 60% of either the lowest sale price for the Company's common stock during the twenty (20) consecutive trading days including and immediately preceding the closing date, or the closing bid price, whichever is lower, provided that, if the price of the Company's common stock loses a bid, then the conversion price may be reduced, at the holder's absolute discretion, to a fixed conversion price of \$0.00001. If at any time the adjusted conversion price for any conversion would be less than par value of the Company's common stock, then the conversion price shall equal such par value for any such conversion and the conversion amount for such conversion shall be increased to include additional principal to the extent necessary to cause the number of shares issuable upon conversion equal the same number of shares as would have been issued had the Conversion Price not been subject to the minimum par value price. The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability. Subsequent to year end approximately \$43,000 of the note was converted.

The Company estimated the fair value of the conversion feature derivatives embedded in the convertible debentures at issuance at \$91,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.11 at issuance date; a risk-free interest rate of 1.41% and expected volatility of the Company's common stock, of 193.79%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$41,500 was immediately expensed as financing costs.

November 14, 2017 Debenture

On November 14, 2017, the Company entered into two 8% convertible redeemable notes, in the aggregate principal amount of \$112,000, convertible into shares of common stock of the Company, with maturity dates of November 14, 2018. Each note was in the face amount of \$56,000, with an original issue discount of \$2,800, resulting in a purchase price for each note of \$53,200. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$53,200 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on July 14, 2018. The notes are convertible at 57% of the lowest of trading price for last 20 days, or lowest closing bid price for last 20 days, with the discount increased to 47% in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. The Buyer Note is included in Notes Receivable in the accompanying financial statements. The first note has been fully converted subsequent to year end.

During the first six months, the convertible redeemable notes are in effect, the Company may redeem the note at amounts ranging from 120% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each debenture.

The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the two convertible debentures at issuance at \$164,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.10 at issuance date; a risk-free interest rate of 1.59% and expected volatility of the Company's common stock, of 192.64%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$63,200 was immediately expensed as financing costs.

December 20, 2017 Debenture

On December 20, 2017, the Company entered into two 8% convertible redeemable notes, in the aggregate principal amount of \$240,000, convertible into shares of common stock, of the Company, with the same buyers as the November 14, 2017 debenture. Both notes are due on December 20, 2018. The first note has face amount of \$160,000, with a \$4,000 OID, resulting in a purchase price of \$156,000. The second note has a face amount of \$80,000, with an OID of \$2,000, for a purchase price of \$78,000. The first of the two notes was paid for by the buyer in cash upon closing, with the second note initially paid for by the issuance of an offsetting \$78,000 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on August 20, 2018. The notes are convertible at 60% of the lower of: (i) lowest trading price or (ii) lowest closing bid price, of the Company's common stock for the last 20 trading days prior to conversion, with the discount increased to 50% in the event of a DTC chill, with the second note not being convertible until the buyer has settled the Buyer Note in cash payment. The Buyer Note is included in Notes Receivable in the accompanying financial statements.

During the first six months, the convertible redeemable notes are in effect, the Company may redeem the note at amounts ranging from 120% to 136% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of each debenture.

The conversion feature meets the definition of a derivative and therefore requires bifurcation and is accounted for as a derivative liability.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the two convertible debentures at issuance at \$403,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.15 at issuance date; a risk-free interest rate of 1.72% and expected volatility of the Company's common stock, of 215.40%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$181,000 was immediately expensed as financing costs.

January 29, 2018 Debenture

On January 29, 2018, the Company entered into three 12% convertible notes of the Company in the aggregate principal amount of \$120,000, convertible into shares of common stock of the Company, with maturity dates of January 29, 2019. The interest upon an event of default, as defined in the note, is 24% per annum. Each note was in the face amount of \$40,000, with \$2,000 legal fees, for net proceeds of \$38,000. The first of the three notes was paid for by the buyer in cash upon closing, with the other two notes initially paid for by the issuance of an offsetting \$40,000 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Notes are due on September 29, 2018. The notes are convertible at 60% of the lowest closing bid price for the last 20 days, with the discount increased to 50% in the event of a DTC chill. The second and third notes not being convertible until the buyer has settled the Buyer Notes in a cash payment. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

During the first 180 days, the convertible redeemable notes are in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of each debenture. Upon any sale event, as defined, at the holder's request the Company will redeem the note for 150% of the principal and accrued interest.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the three convertible debentures at issuance at \$185,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.12 at issuance date; a risk-free interest rate of 1.80% and expected volatility of the Company's common stock, of 215.40%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$71,000 was immediately expensed as financing costs.

January 30, 2018 Debenture

On January 30, 2018, the Company entered into a 12% convertible note for the principal amount of \$80,000, convertible into shares of common stock of the Company, which matures on January 30, 2019. Upon an event of default, as defined in the note, the note becomes immediately due and payable, in an amount equal to 150% of all principal and accrued interest due on the note, with default interest of 22% per annum (the "Default Amount"). If the Company fails to deliver conversion shares within 2 days of a conversion request, the note becomes immediately due and payable at an amount of twice the Default Amount. The note is convertible at 61% of the lowest closing bid price for the last 15 days. Per the agreement, the Company is required at all times to have authorized and reserved six times the number of shares that is actually issuable upon full conversion of the note. Failure to maintain the reserved number of shares is considered an event of default if not cured within three days of a notice of conversion. The Company has not maintained the required share reservation under the terms of the note agreement. The Company believes it has sufficient available shares of the Company's common stock in the event of conversion for these notes. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

During the first 180 days, the convertible redeemable note is in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the debenture.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the convertible debenture at issuance at \$163,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.08 at issuance date; a risk-free interest rate of 1.88% and expected volatility of the Company's common stock, of 215.40%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$83,000 was immediately expensed as financing costs.

On March 9, 2018, the Company entered into a 12% convertible note for the principal amount of \$43,000, with the holder of the January 30, 2018 debenture, convertible into shares of common stock of the Company, which matures on March 9, 2019. Upon an event of default, as defined in the note, the note becomes immediately due and payable, in an amount equal to 150% of all principal and accrued interest due on the note, with default interest of 22% per annum (the "Default Amount"). If the Company fails to deliver conversion shares within 2 days of a conversion request, the note becomes immediately due and payable at an amount of twice the Default Amount. The note is convertible on the date beginning 180 days after issuance of the note, at 61% of the lowest closing bid price for the last 15 days. Per the agreement, the Company is required at all times to have authorized and reserved six times the number of shares that is actually issuable upon full conversion of the note. Failure to maintain the reserved number of shares is considered an event of default. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

During the first 180 days the convertible redeemable note is in effect, the Company may redeem the note at amounts ranging from 115% to 140% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 30 days to 180 days from the date of issuance of the debenture.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the convertible debenture at issuance at \$94,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.09 at issuance date; a risk-free interest rate of 2.03% and expected volatility of the Company's common stock, of 215.40%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$54,000 was immediately expensed as financing costs.

March 20, 2018 Debenture

On March 20, 2018, the Company entered into a convertible note for the principal amount of \$84,000, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lower of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. In the event of a "DTC chill", the conversion rate is adjusted to 40% of the market price. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. The Company has not maintained the required share reservation under the terms of the note agreement. The Company believes it has sufficient available shares of the Company's common stock in the event of conversion for these notes. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

Additionally, the Company also issued 255,675 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$28,124, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the convertible debenture at issuance at \$191,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.06 at issuance date; a risk-free interest rate of 2.09% and expected volatility of the Company's common stock, of 272.06%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$144,124 (including the fair value of the common shares issued) was immediately expensed as financing costs.

March 21, 2018 Debenture

On March 21, 2018, the Company entered into a convertible note for the principal amount of \$39,199, which includes an OID of \$4,199, convertible into shares of common stock of the Company, which matures on December 20, 2018. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lowest of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. The discount is increased upon certain events set forth in the agreement regarding the obtainability of the shares, such as a DTC "chill". Additionally, if the Company ceases to be a reporting company, or after 181 days the note cannot be converted into freely traded shares, the discount is increased an additional 15%. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. The Company has not maintained the required share reservation under the terms of the note agreement. The Company believes it has sufficient available shares of the Company's common stock in the event of conversion for these notes. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

Additionally, the Company also issued 119,300 shares of common stock of the Company as a commitment fee. The commitment shares fair value was calculated as \$13,123, based on the market value of the common shares at the closing date of \$0.11, and was recognized as part of the debt discount.

The Company estimated the aggregate fair value of the conversion feature derivatives embedded in the two convertible debentures at issuance at \$89,000, based on weighted probabilities of assumptions used in the Black Scholes pricing model. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.06 at issuance date; a risk-free interest rate of 2.09% and expected volatility of the Company's common stock, of 272.06%, and the various estimated reset exercise prices weighted by probability. This resulted in the calculated fair value of the debt discount being greater than the face amount of the debt, and the excess amount of \$67,123 (including the fair value of the common shares issued) was immediately expensed as financing costs.

The derivative liability arising from all of the above discussed debentures was revalued at March 31, 2018, resulting in an increase of the fair value of the derivative liability of \$1,616,000 for the year ended March 31, 2018. The key valuation assumptions used consist, in part, of the price of the Company's common stock of \$0.06; a risk-free interest rate ranging from 1.73% to 2.09%, and expected volatility of the Company's common stock ranging from 272.06% to 375.93%, and the various estimated reset exercise prices weighted by probability.

The warrant liability relating to all of the warrant issuances discussed above was revalued at March 31, 2018, resulting in an increase to the fair value of the warrant liability of \$244,000 for the year ended March 31, 2018. The key valuation assumptions used consists, in part, of the price of the Company's common stock of \$0.06; a risk-free interest rate ranging from 2.22% to 2.56%, and expected volatility of the Company's common stock of 358.6%. The warrant liability was remeasured as of March 31, 2017, resulting in an estimated fair value of \$28,000, for a decrease in fair value of \$4,000. The key valuation assumptions used consists, in part, of the price of the Company's common stock of \$0.40; a risk free interest rate of 1.88% and expected volatility of the Company's common stock, of 292.42%.

NOTE 6 – STOCKHOLDERS' DEFICIT

Common Stock

On May 2, 2017, the Company sold 100,000 shares of its common stock at \$0.25 per share, for a total financing of \$25,000.

On August 1, 2016, the Company reached an agreement with a professional advisor in which the Company issued 55,000 shares of common stock with a fair value of \$24,750. This amount was recognized as stock compensation cost for the period ended December 31, 2016.

On October 10, 2016, the Company entered into a form of Subscription Agreement for \$0.35 per common share and issued 28,571 common shares for \$10,000 in cash proceeds.

On January 10, 2017, the Company issued 1,000,000 shares to a consultant for services to be rendered over six months. The fair value of the shares of \$440,000, based on the market value of the common stock on the date of issuance, will be recognized over the term of the agreement. \$220,000 was expensed in the year ending March 31, 2017, with \$220,000 included in prepaid assets as of March 31, 2017. The prepaid balance of \$220,000 was expensed in the year ending March 31, 2018.

The Company issued 1,225,715 shares to two unrelated parties on January 23, 2017, in exchange for the settlement of debt owed by NaturalShrimp Holdings, Inc., a related party (Note 8), previous to the Company's January 2015 reverse acquisition. At the time of the acquisition the Company was not made aware of the debt and therefore did not assume the liability in the purchase agreement. When the Company was presented with the debt during the fiscal year ending March 31, 2017, the Company agreed to assume and settle this debt by the issuance of common shares. The fair value of the shares issued, based on the market value of the common shares on the date of the settlement agreement, was \$563,829.

NOTE 7 – OPTIONS AND WARRANTS

The Company has not granted any options since inception. The Company has granted approximately 4,958,000 warrants (after adjustment) in connection with convertible debentures, of which 333,333 have been exercised. For further discussion see Note 5.

NOTE 8 – RELATED PARTY TRANSACTIONS

Notes Payable – Related Parties

On April 20, 2017, the Company entered into a convertible debenture with an affiliate of the Company whose managing member is the Treasurer, Chief Financial Officer, and a director of the Company (the "affiliate"), for \$140,000. The convertible debenture matures one year from date of issuance, and bears interest at 6%. Upon an event of default, as defined in the debenture, the principal and any accrued interest becomes immediately due, and the interest rate increases to 24%. The convertible debenture is convertible at the holder's option at a conversion price of \$0.30. As of March 31, 2018, the Company has paid \$52,400 on this note, with \$87,600 remaining outstanding.

On January 20, 2017 and on March 14, 2017, the Company entered into convertible debentures with an affiliate of the Company whose managing member is the Treasurer, Chief Financial Officer, and a director of the Company. The convertible debentures are each in the amount of \$20,000, mature one year from date of issuance, and bear interest at 6%. Upon an event of default, as defined in the debenture, the principal and any accrued interest becomes immediately due, and the interest rate increases to 24%. The convertible debentures are convertible at the holder's option at a conversion price of \$0.30. As of March 31, 2018, the notes have been paid off in full.

NaturalShrimp Holdings, Inc.

On January 1, 2016 the Company entered into a notes payable agreement with NaturalShrimp Holdings, Inc. (“NSH”), a shareholder. Between January 16, 2016 and March 7, 2016, the Company borrowed \$134,750 under this agreement. An additional \$601,361 was borrowed under this agreement in the year ended March 31, 2017. The note payable has no set monthly payment or maturity date with a stated interest rate of 2%.

Baptist Community Services (BCS)

On January 10, 2017, the Company agreed to pay to Baptist Community Services (BCS), a shareholder of NSH, \$200,000 of the proceeds from the CNB Note (Note 4), in satisfaction of the outstanding amounts due on a promissory note with BCS of \$2,305,953, plus accrued interest of \$233,398, resulting in a gain on extinguishment of debt of \$2,339,353 in the year ended March 31, 2017.

Shareholder Notes

The Company has entered into several working capital notes payable to multiple shareholders of NSH and Bill Williams, an officer, a director, and a shareholder of the Company, for a total of \$486,500. These notes had stock issued in lieu of interest and have no set monthly payment or maturity date. The balance of these notes at March 31, 2018 and 2017 was \$426,404 and \$426,404, respectively, and is classified as a current liability on the consolidated balance sheets. At March 31, 2018 and 2017, accrued interest payable was \$206,920 and \$172,808, respectively.

Shareholders

In 2009, the Company entered into a note payable to Randall Steele, a shareholder of NSH, for \$50,000. The note bears interest at 6.0% and was payable upon maturity on January 20, 2011. In addition, the Company issued 100,000 shares of common stock for consideration. The shares were valued at the date of issuance at fair market value. The value assigned to the shares of \$50,000 was recorded as increase in common stock and additional paid-in capital and was limited to the value of the note. The assignment of a value to the shares resulted in a financing fee being recorded for the same amount. The note is unsecured. The balance of the note at March 31, 2018 and 2017 was \$50,000, respectively, and is classified as a current liability on the consolidated balance sheets. Interest expense on the note was \$3,000 and \$3,000 during the years ended March 31, 2018 and 2017, respectively.

Beginning in 2010, the Company started entering into several working capital notes payable with various shareholders of NSH for a total of \$290,000 and bearing interest at 8%. The balance of these notes at March 31, 2018 and 2017 was \$5,000 and is classified as a current liability on the consolidated balance sheets. At March 31, 2018 and 2017, accrued interest payable was \$1,600 and \$1,200, respectively.

NOTE 9 – FEDERAL INCOME TAX

The Company accounts for income taxes under ASC 740-10, which provides for an asset and liability approach of accounting for income taxes. Under this approach, deferred tax assets and liabilities are recognized based on anticipated future tax consequences, using currently enacted tax laws, attributed to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts calculated for income tax purposes.

The components of income tax expense for the years ended March 31, 2018 and 2017 consist of the following:

	<u>2018</u>	<u>2017</u>
Federal Tax statutory rate	34.00%	34.00%
Permanent differences	7.86%	559.25%
Valuation allowance	(41.86)%	(525.25)%
Effective rate	<u>0.00%</u>	<u>0.00%</u>

Significant components of the Company's deferred tax assets as of March 31, 2018 and 2017 are summarized below. The calculations presented below at December 31, 2017 reflect the new U.S. federal statutory corporate tax rate of 21% effective January 1, 2018 (see Note 2).

	2018	2017
Deferred tax assets:		
Net operating loss carryforwards	\$ 637,000	\$ 570,000
Deferred tax benefit	408,000	350,000
Total deferred tax asset	1,045,000	920,000
Valuation allowance	(1,045,000)	(920,000)
	<u>\$ -</u>	<u>\$ -</u>

As of March 31, 2018, the Company had approximately \$3,034,000 of federal net operating loss carry forwards. These carry forwards, if not used, will begin to expire in 2028. Future utilization of the net operating loss carry forwards is subject to certain limitations under Section 382 of the Internal Revenue Code. The Company believes that the issuance of its common stock in exchange for Multiplayer Online Dragon, Inc. January 30, 2015 resulted in an "ownership change" under the rules and regulations of Section 382. Accordingly, our ability to utilize our net operating losses generated prior to this date is limited to approximately \$282,000 annually.

To the extent that the tax deduction is included in a net operating loss carry forward and is in excess of amounts recognized for book purposes, no benefit will be recognized until the loss carry forward is recognized. Upon utilization and realization of the carry forward, the corresponding change in the deferred asset and valuation allowance will be recorded as additional paid-in capital.

The Company provides for a valuation allowance when it is more likely than not that it will not realize a portion of the deferred tax assets. The Company has established a valuation allowance against the net deferred tax asset due to the uncertainty that enough taxable income will be generated in those taxing jurisdictions to utilize the assets. Therefore, we have not reflected any benefit of such deferred tax assets in the accompanying financial statements. Our net deferred tax asset and valuation allowance increased by \$120,000 in the year ended March 31, 2018, \$394,000 of which related to the decrease in the expected future tax rate as a result of the Tax Reform Law..

The Company reviewed all income tax positions taken or that we expect to be taken for all open years and determined that our income tax positions are appropriately stated and supported for all open years. The Company is subject to U.S. federal income tax examinations by tax authorities for years after 2012 due to unexpired net operating loss carryforwards originating in and subsequent to that year. The Company may be subject to income tax examinations for the various taxing authorities which vary by jurisdiction.

NOTE 10 – CONCENTRATION OF CREDIT RISK

The Company maintains cash balances at one financial institution. Accounts at this institution are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000. As of March 31, 2018, and 2017, the Company's cash balance did not exceed FDIC coverage.

NOTE 11 – COMMITMENTS AND CONTINGENCIES

Executive Employment Agreements – Bill Williams and Gerald Easterling

On April 1, 2015, the Company entered into employment agreements with each of Bill G. Williams, as the Company's Chief Executive Officer, and Gerald Easterling as the Company's President, effective as of April 1, 2015 (the "Employment Agreements").

The Employment Agreements are each terminable at will and each provide for a base annual salary of \$96,000. In addition, the Employment Agreements each provide that the employee is entitled, at the sole and absolute discretion of the Company's Board of Directors, to receive performance bonuses. Each employee will also be entitled to certain benefits including health insurance and monthly allowances for cell phone and automobile expenses.

Each Employment Agreement provides that in the event employee is terminated without cause or resigns for good reason (each as defined in their Employment Agreements), the employee will receive, as severance the employee's base salary for a period of 60 months following the date of termination. In the event of a change of control of the Company, the employee may elect to terminate the Employment Agreement within 30 days thereafter and upon such termination would receive a lump sum payment equal to 500% of the employee's base salary.

Each Employment Agreement contains certain restrictive covenants relating to non-competition, non-solicitation of customers and non-solicitation of employees for a period of one year following termination of the employee's Employment Agreement.

NOTE 12 – SUBSEQUENT EVENTS

Subsequent to year end, the Company has converted approximately \$485,000 of their outstanding convertible debt as of March 31, 2018 and approximately \$31,000 of accrued interest, into 37,887,704 shares of the Company's common stock.

On April 10, 2018, the Company entered into two 10% convertible notes in the aggregate principal amount of \$110,000, convertible into shares of common stock of the Company, with maturity dates of April 10, 2019. The interest upon an event of default, as defined in the note, is 24% per annum. Each note was in the face amount of \$55,000, with \$2,750 for legal fees deducted upon funding. The first of the notes was paid for by the buyer in cash upon closing, with the other note ("Back-End note") initially paid for by the issuance of an offsetting \$55,000 secured promissory note issued to the Company by the buyer ("Buyer Note"). The Buyer Note is due on December 12, 2018. The notes are convertible at 57% of the lowest closing bid price for the last 20 days. The Back-End note is not convertible until the buyer has settled the Buyer Notes in a cash payment. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

During the first 180 days the convertible redeemable note is in effect, the Company may redeem the note at amounts ranging from 130% to 145% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 60 days to 180 days from the date of issuance of the debenture

On April 12, 2018, the Company sold 200,000 shares of its common stock at \$0.077 per share, for a total financing of \$15,400.

On April 27, 2018, the Company entered into a convertible note for the principal amount of \$53,000 for a purchase price of \$50,000, convertible into shares of common stock of the Company, which matures on January 27, 2019. The note bears interest at 12% for the first 180 days, which increases to 18% after 180 days, and 24% upon an event of default. The note is convertible on the date beginning 180 days after issuance of the note, at the lowest of 60% of the lowest trading price for the last 20 days prior to the issuance date of this note, or 60% of the lowest trading price for the last 20 days prior to conversion. In the event of a "DTC chill", the conversion rate is adjusted to 40% of the market price. Per the agreement, the Company is required at all times to have authorized and reserved ten times the number of shares that is actually issuable upon full conversion of the note. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

On June 5, 2018, the Company entered into a convertible note for the principal amount of \$125,000 for a purchase price of \$118,800, convertible on the date beginning 180 days after issuance of the note, into shares of common stock of the Company, which matures on June 5, 2019. The note bears interest at 12%, which increases to 18% upon an event of default, as defined in the agreement. The note is convertible at 60% of the lowest trading price for the last 20 days prior to conversion, with the discount increased 5% in the event the Company does not have sufficient shares authorized and outstanding to issue the shares upon conversion request. Per the agreement, the Company is required at all times to have authorized and reserved four times the number of shares that is actually issuable upon full conversion of the note. The conversion feature meets the definition of a derivative and therefore requires bifurcation and will be accounted for as a derivative liability.

During the first 180 days the convertible redeemable note is in effect, the Company may redeem the note at amounts ranging from 135% to 145% of the principal and accrued interest balance, based on the redemption date's passage of time ranging from 90 days to 180 days from the date of issuance of the debenture. After 180 days, the note is redeemable, with the holders prior written consent, at 150% of the principal and accrued interest balance.

On July 11, 2018, the Company received the funding for the Buyer Note issued in connection with the second note under the December 20, 2017 8% convertible redeemable note, for cash proceeds of \$74,000.

NATURALSHRIMP INCORPORATED
CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Bill G. Williams, certify that:

1. I have reviewed this Annual Report on Form 10-K of NaturalShrimp Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
